Mail: Values and Attitudes

Sibling Mail: Values and Attitudes Module

OVERVIEW

This module replicates personality (the Big 5) and psychological well being items from the 2005 mail survey. Although the majority of scales and items have been retained, some may have been slightly altered or removed altogether. Additionally, new items have been added to capture participants' perceptions of male social roles, gender roles within marriage, and their attitudes towards old age and aging.

Note: Extraversion is one of the Big Five personality traits and can range in degree from 1 (the lowest possible) to 36 (the highest possible). This variable is coded with a sum if at least one of its six component items received a valid response. See PH002RE for the number of items included in the sum.
Note: Constructed from variables PH003RER-PH008RER; items y_val1_1, y_val1_6, and y_val1_22 were reverse coded before being used to create the summary score.
Note: See PH001REI for an updated version of this variable for which the mean of the valid responses is imputed for any missing responses.
