In Person: Cognition - Word Recall

KRECALL Cognition - Word Recall Module

OVERVIEW

The Cognition - Word Recall Module, which was first administered to a randomly selected 80% sub-sample during the 2005 collection wave, assesses cognitive ability by asking participants to remember and orally repeat as many words as they can from a set of ten. As a comparative test of immediate versus time-delayed memory retention, participants were asked to repeat words from their set both right after an interviewer had read them aloud as well as after four subsequent survey modules had been completed. For the 2011 CAPI interview, the exact same version of the Word Recall Task used in 2005 was once again administered to a randomly selected 80% sub-sample. Prior to attempting the task, selected participants were told:

> "Part of this study is concerned with people's memory. I'll read a set of 10 words and ask you to recall as many as you can. Please listen carefully as I read the set of words. I'm not allowed to repeat any of the words, so it's important that you can hear me very well. When I finish, I will ask you to recall aloud as many of the words as you can, in any order. Is this clear?"

If the participant understood these instructions and agreed to attempt the Word Recall Task, the interviewer proceeded to read them one of two possible sets of ten words. Then, the participant was prompted to repeat as many of the words as they could remember, with the interviewer recording their correct responses - as well as flagging any words not on the original list - in order. Once the participant finished stating remembered words, they were given positive feedback (e.g. "thank you, you did well on that") and the first session of the Word Recall Task was ended without any indication there would be a follow-up. After four more survey modules (Volunteering, Care Giving, Internet Use, and Alcohol) were completed and an average of nine minutes had elapsed, participants who completed the first word recall session were reminded, "a little while ago, I read you a list of words and you repeated the ones you could remember." Then, they were instructed to, "please tell me any of the words that you remember now," with their interviewer once again recording all responses in order. At no point were participants informed as to the correctness or incorrectness of their recalled words.

While the 2011 Cognition - Word Recall Module is highly comparable to its 2005 predecessor, data users should be aware of a few minor changes. First, the interval between immediate and delayed sessions of the Word Recall Task was slightly altered. Unlike in 2005, when the sessions were separated by six survey modules, the 2011 sessions were only separated by four modules. Second, although cases were flagged as "suspicious" and reviewed for a number of reasons in 2005 - a process represented to data users by 2005 analysis variables CI419RE, CI420RE, CI459RE, and CI460RE - no similar inspection efforts were made in 2011; in other words, CI419RE, CI420RE, CI459RE, and CI460RE were not replicated. Since the 2011 interview was conducted in-person rather than by telephone, as in 2005, it was deemed unnecessary to closely check cases for cheating or improper Word Recall Task administration. Instead, field interviewers were expected to identify and report such issues to WLS staff, who handled them on a case-by-case basis. Third and finally, when participants finished repeating words for a session of the Word Recall Task in 2011, they were coded as "inappropriate" (-2) on analysis variables for

volunteering additional words rather than "don't know / task complete" (-1), the coding applied in 2005 (see KI421RE-KI432RE and KI461RE-KI477RE). For information about the nature of the Cognition - Word Recall Module and our cognition data at prior collection waves, please see Appendix G (CORs 825, 900, and 943). No new documentation about the Word Recall Task was added to the appendix for the 2011 collection wave.

BRIEF VARIABLE DESCRIPTIONS

Variable ranges reference dataset/codebook order and are not necessarily alphabetical.

KIMMSTAT-KDELREL:	Module-Level Status Variables
KI401RE:	Random 80% Sub-Sampling Flag Dictating Whether Word Recall Task Administered to Participant
KI401REA:	Flag for Outcome of Word Recall Task
KI402RE:	Set of Ten Words Read to Participant During Administration of Word Recall Task
KI403RE-KI412RE:	Indicators for Whether or Not Participant Remembered Each Word on Their List During Immediate Recall Session
KI413RE:	Number of Correct Words Participant Repeated During Immediate Recall Session
KI414RE:	Number of Incorrect Words Participant Said During Immediate Recall Session
KI416RE:	Time Elapsed Between Conclusion of Immediate Recall Session and Beginning of Delayed Recall Session
KI417RE:	Number of Words on List Participant Repeated During Delayed Recall Session But Did Not Repeat During Immediate Recall Session
KI418RE:	Number of Words on List Participant Repeated During Immediate Recall Session But Did Not Repeat During Delayed Recall Session
KI421RE-KI432RE:	Order of Words Participant Said During Immediate Recall Session
KI447RE-KI456RE:	Indicators for Whether or Not Participant Remembered Each Word on Their List During Delayed Recall Session
KI457RE:	Number of Correct Words Participant Repeated During Delayed Recall Session

```
KI458RE:                Number of Incorrect Words Participant Said
                        During Delayed Recall Session

KI461RE-KI477RE:        Order of Words Participant Said During
                        Delayed Recall Session
```

kimmstat: Was the immediate recall session of the Cognition - Word Recall Module completed by Participant alone, with help, or by proxy?

Data source: Sibling Participant or Proxy Collected in: 2011 Mode: In person & telephone
Source variables: y_immproxy1, y_immhelp0, capiproxy, y_proxy, and y_ivwloc

		Frequencies		
Value	**Label**	**Male**	**Female**	**Total**
.	System missing - NR	2736	2510	5246
-30	NOT PART OF MOSAQ	72	63	135
-27	NOT ASKED OF PROXY	5	12	17
-5	PARTIAL INTERVIEW	1	1	2
-2	Inappropriate Inap, not in sample (y_alcflag != 1)	356	392	748
1	R COMPLETED ALONE	1144	1303	2447
2	R COMPLETED ALONE WITH SOMEONE ELSE IN THE ROOM	122	60	182
4	R RECEIVED A LOT OF HELP	1	0	1

Note: Since the immediate and delayed sessions of the Word Recall Task were separated by four CAPI modules, this module contains two sets of status variables, one corresponding to the immediate session (see also KIMMREL) and the other corresponding to the delayed session (see KDELSTAT and KDELREL).
Note: For many cases a participant's spouse or other family member was present during the interview. This sometimes resulted in the participant relying on the other person for help in answering some or many of the questions. At the end of each module the interviewer indicated the amount of help the participant received and who provided that help. That assessment is covered by codes 1 through 5. Additionally, a code of 7 indicates that the entire interview was administered to a proxy while a code of 6 indicates that this particular module was answered by a proxy but other modules were answered by the participant.

kimmrel: Relationship to Participant of helper or proxy for the immediate recall session of the Cognition - Word Recall Module.

Data source: Sibling Participant or Proxy Collected in: 2011 Mode: In person & telephone
Source variables: kimmstat, y_immproxy1, y_immhelp0, y_immhelp1, y_immhelp2_hfn, y_immhelp3, y_h1fn to y_h4fn, y_pfn, prxyfnam, y_p1fn to y_p5fn, y_prel, prxyrel, and y_p1rel to y_p5rel

		Frequencies		
Value	**Label**	**Male**	**Female**	**Total**
.	System missing - NR	2736	2510	5246
-30	NOT PART OF MOSAQ	72	63	135
-27	NOT ASKED OF PROXY	5	12	17
-5	PARTIAL INTERVIEW	1	1	2
-2	Inappropriate Inap, not in sample (y_alcflag != 1) or kimmstat=1,2,-3	1622	1755	3377
0	SPOUSE	1	0	1

Note: Since the immediate and delayed sessions of the Word Recall Task were separated by four CAPI modules, this module contains two sets of status variables, one corresponding to the immediate session (see also KIMMSTAT) and the other corresponding to the delayed session (see KDELSTAT and KDELREL).
Note: If this module was administered via proxy or if the participant received help answering the questions in this module then the interviewer recorded the relationship of the proxy/helper to the participant. Although most participants relied on only one helper or proxy for the interview, some had more than one. Thus the value of the relationship code may vary across the modules.

kdelstat: Was the delayed recall session of the Cognition - Word Recall Module completed by Participant alone, with help, or by proxy?

Data source: Sibling Participant or Proxy Collected in: 2011 Mode: In person & telephone
Source variables: y_delproxy1, y_delhelp0, capiproxy, y_proxy, and y_ivwloc

		Frequencies		
Value	**Label**	**Male**	**Female**	**Total**

-2	Inappropriate Inap, not in sample (y_alcflag != 1) or kdelstat=1,2,-3	1617	1754	3371
0	SPOUSE	5	1	6
48	SON	1	0	1

Note: Since the immediate and delayed sessions of the Word Recall Task were separated by four CAPI modules, this module contains two sets of status variables, one corresponding to the immediate session (see KIMMSTAT and KIMMREL) and the other corresponding to the delayed session (see also KDELSTAT).
Note: If this module was administered via proxy or if the participant received help answering the questions in this module then the interviewer recorded the relationship of the proxy/helper to the participant. Although most participants relied on only one helper or proxy for the interview, some had more than one. Thus the value of the relationship code may vary across the modules.

ki401re: Summary of whether Participant belonged to the 80% sub-sample randomly selected to complete the Word Recall Task.

Data source: Sibling Participant or Proxy Collected in: 2011 Mode: In person & telephone
Source variables: y_alcflag

		Frequencies		
Value	**Label**	**Male**	**Female**	**Total**
.	System missing - NR	2736	2510	5246
-30	NOT PART OF MOSAQ	72	63	135
-5	PARTIAL INTERVIEW	1	1	2
0	NO, NOT IN 80% SUB-SAMPLE	356	392	748
1	YES, IN 80% SUB-SAMPLE	1272	1375	2647

Note: The Word Recall Task included two sessions: an immediate recall session, which was administered right after the interviewer read the participant a set of ten words (see KI402RE), and a delayed recall session, which was administered after four subsequent CAPI modules had been completed and an average of nine minutes had elapsed (see KI416RE).

ki401rea: Flag for outcome of the Word Recall Task.

Data source: Sibling Participant or Proxy Collected in: 2011 Mode: In person & telephone
Source variables: ki401re, y_i1rand, y_i1alist, y_i1blist, ki421re-ki432re, y_i1a2spfy, c_y_i1a2spfy, y_i1b2spfy, c_y_i1b2spfy, ki461re-ki477re, y_i10aspfy, c_y_i10aspfy, y_i10bspfy, c_y_i10bspfy

		Frequencies		
Value	**Label**	**Male**	**Female**	**Total**
.	System missing - NR	2736	2510	5246
-30	NOT PART OF MOSAQ	72	63	135
-27	NOT ASKED OF PROXY	5	12	17
-5	PARTIAL INTERVIEW	1	1	2
-2	Inappropriate INAPPROPRIATE (ki401re = 0)	356	392	748
1	COMPLETED BOTH SESSIONS OF TASK WITHOUT INCIDENT	1239	1351	2590
3	COMPLETED IMMEDIATE SESSION WITHOUT INCIDENT, BUT DELAYED NOT ADMINISTERED PROPERLY OR AT ALL	1	2	3
5	COMPLETED IMMEDIATE SESSION, DELAYED NOT ADMINISTERED DUE TO MULTIPLE INTERVIEW SESSIONS	1	0	1
6	BOTH SESSIONS OF TASK NOT ADMINISTERED PROPERLY OR AT ALL	14	4	18
7	REFUSED ENTIRE TASK AFTER LIST OF WORDS WAS READ	2	1	3
8	REFUSED ENTIRE TASK BEFORE LIST OF WORDS WAS READ	10	5	15

Note: The Word Recall Task included two sessions: an immediate recall session, which was administered right after the interviewer read the participant a set of ten words (see KI402RE), and a delayed recall session, which was administered after four subsequent CAPI modules had been completed and an average of nine minutes had elapsed (see KI416RE). Participants who repeated as many words from their list as

they could remember during both sessions of the Word Recall Task were assigned values of "1" on this variable if the interviewer did not have any problems understanding or recording their responses; if the participant completed both sessions but minor problems occurred (e.g. the interviewer did not understand one of the words said by the participant), a value of "2" was assigned. Values of "3" and "4" were assigned if the delayed recall session was not properly administered after the participant had adequately completed the immediate session. Examples of improper administration would include skipping the delayed recall session altogether (perhaps due to CAPI instrument malfunction), interviewer repetitions of any words on the participant's list, and so forth. Values of "6" were assigned to participants for whom both sessions of the Word Recall Task were improperly administered, improper administration of the immediate recall session (e.g. the session was interrupted by a telephone call) automatically invalidating the delayed session. If the immediate recall session was satisfactorily completed but the delayed recall session was not administered during the same interviewing episode, the participant was assigned a value of "5" on this variable and values of "-15" on all variables referencing the delayed session (KI416RE-KI418RE and KI447RE-KI477RE).

ki402re: Set of ten words assigned to Participant for administration of Word Recall Task.

Data source: Sibling Participant or Proxy Collected in: 2011 Mode: In person & telephone
Source variables: ki401re, y_i1rand

		Frequencies		
Value	**Label**	**Male**	**Female**	**Total**
.	System missing - NR	2736	2510	5246
-30	NOT PART OF MOSAQ	72	63	135
-27	NOT ASKED OF PROXY	5	12	17
-5	PARTIAL INTERVIEW	1	1	2
-2	Inappropriate INAPPROPRIATE (ki401re = 0)	356	392	748
1	WORD LIST #1	639	691	1330
2	WORD LIST #2	628	672	1300

Note: One of two possible ten-word sets was read to the participant for the Word Recall Task, which included two sessions: an immediate recall session, which was administered right after the interviewer read the participant a set of words for the first time, and a delayed recall session, which was administered after four subsequent CAPI modules had been completed and an average of nine minutes had elapsed (see KI416RE). Participants in category "1" (50% of those eligible for the task) were read this set of ten words in order: hotel, river, tree, skin, gold, market, paper, child, king, book. Participants in category "2" (the other 50% of those eligible for the task) were read this set in order: water, church, doctor, palace, fire, garden, sea, village, baby, table. Participants were asked to repeat as many words from their list as they

could remember during both sessions of the Word Recall Task.

ki403re: Summary of whether Participant repeated ’HOTEL/WATER’ during the immediate recall session of the Word Recall Task.

Data source: Sibling Participant or Proxy Collected in: 2011 Mode: In person & telephone
Source variables: ki401rea, ki421re-ki432re

		Frequencies		
Value	**Label**	**Male**	**Female**	**Total**
.	System missing - NR	2736	2510	5246

2	NO	466	466	932

Note: "Hotel" and "water" were the first words in Word Recall Task sets #1 and #2 respectively (see KI402RE). The delayed recall session of the task, during which the participant was once again asked to repeat as many words from their set of ten as they could remember, took place four survey modules and an average of nine minutes (see KI416RE) after the immediate recall session was concluded. Participants in category "5" of KI401REA have been assigned values of "-15" on this variable. Cases coded as "-5" on this variable but not on KI401REA quit their CAPI interviews between the immediate and delayed recall sessions; such cases generally have values of "3" or "4" on KI401REA.

ki448re: Summary of whether Participant repeated ’RIVER/CHURCH’ during the delayed recall session of the Word Recall Task.

Data source: Sibling Participant or Proxy Collected in: 2011 Mode: In person & telephone
Source variables: ki401rea, ki461re-ki477re

9	KING/BABY	58	71	129
10	BOOK/TABLE	31	25	56
11	WORD NOT ON LIST	47	39	86

Note: The delayed recall session of the Word Recall Task took place four survey modules and an average of nine minutes (see KI416RE) after the immediate recall session was concluded. While attempting to repeat all ten words on the list previously read to them (see KI402RE), some participants mistakenly said words that were not on the list at all; whenever this happened, participants were assigned values of "11", signifying "word not on list." Participants who could not remember any of the words on their list have

been assigned values of "-1" on this variable while those in category "5" of KI401REA have been assigned values of "-15". Cases coded as "-5" on this variable but not on KI401REA quit their CAPI interviews between the immediate and delayed recall sessions; such cases generally have values of "3" or "4" on KI401REA.

ki462re: Second word said by Participant during the delayed recall session of the Word Recall Task.

Table of Contents

In Person: Cognition - Word Recall 1
kimmstat: Was the immediate recall session of the Cognition - Word Recall Module completed by Participant alone, with help, or by proxy? 3
kimmrel: Relationship to Participant of helper or proxy for the immediate recall session of the Cognition - Word Recall Module. 4
kdelstat: Was the delayed recall session of the Cognition - Word Recall Module completed by Participant alone, with help, or by proxy? 4
kdelrel: Relationship to Participant of helper or proxy for the delayed recall session of the Cognition - Word Recall Module. 5
ki401re: Summary of whether Participant belonged to the 80% sub-sample randomly selected to complete the Word Recall Task. 6
ki401rea: Flag for outcome of the Word Recall Task. 7
ki402re: Set of ten words assigned to Participant for administration of Word Recall Task. . . 8
ki403re: Summary of whether Participant repeated ’HOTEL/WATER’ during the immediate recall session of the Word Recall Task. 9
ki404re: Summary of whether Participant repeated ’RIVER/CHURCH’ during the immediate recall session of the Word Recall Task. 9
ki405re: Summary of whether Participant repeated ’TREE/DOCTOR’ during the immediate recall session of the Word Recall Task. 10
ki406re: Summary of whether Participant repeated ’SKIN/PALACE’ during the immediate recall session of the Word Recall Task. 11
ki407re: Summary of whether Participant repeated ’GOLD/FIRE’ during the immediate recall session of the Word Recall Task. 11
ki408re: Summary of whether Participant repeated ’MARKET/GARDEN’ during the immediate recall session of the Word Recall Task. 12
ki409re: Summary of whether Participant repeated ’PAPER/SEA’ during the immediate recall session of the Word Recall Task. 13
ki410re: Summary of whether Participant repeated ’CHILD/VILLAGE’ during the immediate recall session of the Word Recall Task. 13
ki411re: Summary of whether Participant repeated ’KING/BABY’ during the immediate recall session of the Word Recall Task. 14
ki412re: Summary of whether Participant repeated ’BOOK/TABLE’ during the immediate recall session of the Word Recall Task. 15
ki413re: Number of correct words repeated by Participant during the immediate recall session of the Word Recall Task. 15
ki414re: Number of incorrect words said by Participant during the immediate recall session of the Word Recall Task. 16
ki416re: Time in seconds elapsed between conclusion of the immediate recall session of the Word Recall Task and the beginning of the delayed recall session. 17
ki417re: Number of correct words repeated by Participant during the delayed recall session of the Word Recall Task that were not previously repeated during the immediate recall session. . 18
ki418re: Number of correct words repeated by Participant during the immediate recall session of the Word Recall Task that were not later repeated during the delayed recall session. . . . 19
ki421re: First word said by Participant during the immediate recall session of the Word Recall

Task. 21
ki422re: Second word said by Participant during the immediate recall session of the Word Recall Task. 22
ki423re: Third word said by Participant during the immediate recall session of the Word Recall Task. 22
ki424re: Fourth word said by Participant during the immediate recall session of the Word Recall Task. 23
ki425re: Fifth word said by Participant during the immediate recall session of the Word Recall Task. 24
ki426re: Sixth word said by Participant during the immediate recall session of the Word Recall Task. 25
