Mail: How You've Felt This Past Week

Sibling Mail: How You've Felt This Past Week Module

OVERVIEW

This module perfectly replicates the How You've Felt This Past Week section of the 2005 mail survey. It asks participants a series of questions relating to how frequently they have felt or behaved in certain ways during the past week. Items specifically focus on the emotional dimensions of depression, hostility, anger, and anxiety.

BRIEF VARIABLE DESCRIPTIONS

Variable ranges reference dataset/codebook order and are not necessarily alphabetical.

PU001REC, PU002RE:	Depression Summary (Modified CES-D)
PU003RER-PU022RER:	Specific Depression Items
PU026REC, PU027RE:	Hostility Summary
PU023RER-PU025RER:	Specific Hostility Items
PUA33REC, PUB033RE:	Anxiety Summary (Speilberger Anxiety Index)
PUA34REC, PUB034RE:	Anger Summary (Speilberger Anger Index)
PU035RER-PU048RER:	Specific Items (Anxiety and Anger)

pu001rec: Summary score for psychological distress/depression, Modified CES-D.

Data source: Sibling Participant or Proxy Collected in: 2011 Mode: Mail
Source variables: y_felt1_:1-20, y_flt1nw_:1r-20r

		Frequencies		
Value	**Label**	**Male**	**Female**	**Total**
.	System missing - NR	3014	2774	5788
-27	NOT ASKED OF PROXY	6	7	13
-2	Inappropriate INAPPROPRIATE (PU002RE < 10)	61	71	132
0	LOWEST POSSIBLE	107	82	189
1 - 6		263	309	572
7 - 12		309	277	586
13 - 19		267	303	570
20 - 32		257	296	553
33 - 123		153	222	375

Note: The questions used to calculate PU001REC are the same as those used for the standard CES-D. The scoring method differs from the standard formulation, however. This variable represents the sum of days in the past week that the participant felt particular ways. Since the CES-D is constructed from 20 items, PU001REC can thus range from a minimum value of 0 to a maximum of 140. The standard method, on the other hand, collapses the number of days into categories of less than 1, 1-2, 3-4, and 5-7 and codes them from 0 to 3 respectively. When summed across the CES-D's 20 constituent items, this yields a score between 0 and 60. See PU002RE for the number of CES-D questions answered.
Note: Items y_felt1_4/y_flt1nw_4r, y_felt1_7/y_flt1nw_7r, y_felt1_14/y_flt1nw_14r, and y_felt1_16/y_flt1nw_16r were reverse coded before making any contributions to the Modified CES-D psychological distress/depression summary score.
Note: If a participant answered three or more questions in the CES-D section with non-zero responses while leaving all others blank, it was assumed that they only answered the questions that applied to them. In such cases, a sum was computed for PU001REC using zero as the assumed score for unanswered questions; these unanswered items were counted as answered items with valid data in PU002RE. Regardless of how it was obtained, if valid data exists for 10 or more CES-D questions, a sum was computed for PU001REC.

pu002re: Number of psychological distress/depression questions answered.

Data source: Sibling Participant or Proxy Collected in: 2011 Mode: Mail

20		1	0	1
21	HIGHEST POSSIBLE	2	1	3

Note: Constructed from variables PU023RER-PU025RER. If the participant answered at least 2 of the index's 3 constituent items, a summary score was computed as the sum of answered items. Otherwise, PU026REC was assigned a value of "-2" and coded as inappropriate. The level of hostility can range from 0 (the lowest possible) to 21 (the highest possible). See PU027RE for the number of constituent items with valid responses.

pu027re: Number of Hostility Index items answered.
