In Person: Siblings

KSIB Sibling Module

OVERVIEW

1975 Graduate Interview information on all Siblings

In the 1975 Wave of the WLS, Graduates were asked about brothers and sisters who were born alive but no longer living, as well as those who were still living. They were also asked to include step-brothers and step-sisters and children adopted by their parents. They reported total number of sisters/brothers and the number of older sisters/brothers. In addition they were asked the sex, name, age and level of education of each living brother and sister. The interviewer then asked whether or not the graduate was a twin. If the graduate had a twin, that sibling was chosen to be the selected sibling, otherwise the interviewer randomly chose one of these living siblings to be the selected sibling.

1975 Graduate Interview Information on Selected Sibling

The 1975 Graduate instrument collected the name and location of the last high school the sibling attended, the kind of work the sibling did or used to do and the current address of the sibling.

1977 Sibling Interview (Interviews conducted with about 2000 sibling participants. If the graduate had a twin then that sibling was interviewed, otherwise a sibling was randomly selected.)

The Sibling participant was asked whether or not the sibling and the graduate were full siblings or something else and whether they lived in the same household most of the time until the sibling was about 16 years old.

1993 Graduate Interview information on sibling roster

Participants who were non-respondents in 1975 were asked to list the names of their living biological or adopted brothers and sisters. (Note, early in the fielding the language "full" siblings was used instead of "biological" siblings. This likely resulted in some of these participants not reporting on half-siblings. These non-respondents in 1975 were also asked the sex, relationship (full, adopted or half), and age of each sibling. Note that this group did not get asked about step brothers and sisters. The interviewer randomly chose a brother or sister to be the selected sibling for this group of graduate participants.

1993 Graduate Interview information on selected sibling

Graduates were asked about the mortality status of the selected siblings. If they reported that the selected sibling has died they were asked a series of questions about the death and about the work that the graduate did.

All 1993 participants were asked the same questions about living selected

sibling regardless of whether or not they participated in the 1975 wave of the interview. Specifically, they were asked whether or not they lived in the same household as the selected sibling most of the time until they were 16 years old, the current marital status of the sibling, the number of children the selected sibling had, work status, the kind of work the sibling did or used to do, whether or not the graduate helped the sibling find a job, the frequency of contact with the sibling, whether or not they had a similar outlook on life, how close they are to the sibling, how they compared themselves in terms of education, work and finances.

1994 Sibling Interview (In this wave we attempted to interview a sibling participant for each graduate. Unfortunately the budget ran out before we could complete the fielding of the sibling panel.)

1994 Sibling Interview information collected on graduate

If the graduate was no longer living that the interviewer did a mortality closeout on the graduate. The mortality closeout collected information on the graduate's time and cause of death and information on the work the graduate did.

If the graduate was alive then the interviewer asked the selected sibling the same series of questions about the graduate that the graduate was asked about the sibling in 1993. Specifically the sibling was again asked about whether they lived in the same household most of the time until they were about 17 years old, whether or not the sibling helped the graduate find a job, the frequency of contact with the graduate, whether or not they had a similar outlook on life, how close they are to the graduate, how they compared themselves in terms of education, work and finances.

2004 Graduate Interview and 2005 Sibling Interview

Similar instruments were used to update information about the graduate and selected sibling in the 2004 Graduate Wave and 2005 Sibling wave of the WLS. If either reported that the other had died then the interviewer did a mortality closeout interview with the surviving participant to gather information on the deceased participant.

The information collected about the graduate from the selected sibling varied depending on whether or not the graduate completed the 2004 wave of the survey. If the graduate was alive but did not participate in the 2004 wave then the selected sibling was asked about the graduate's current marital status and current location.

All graduates and selected siblings reported on their frequency of contact, whether they shared the same outlook on life, and how close they were to each other. Twenty percent of graduate and sibling participants were asked to compare themselves to the other in terms of education, work and finances.

Information collected on the sibling roster (eg. Not the graduate or the selected sibling.)

There was a difference between the questions that were asked of the graduate participant in 2004 and the sibling participant in 2005. Both graduate and selected sibling participants were asked if they had any brothers or sisters who had a physical or mental disability or mental illness. Graduates were next asked "Did you grow up with any other brothers or sisters who are no longer living?" If the graduate answered "yes" then the interviewer asked which sibling died and searched for the name of that sibling in a list of siblings based on prior interviews. If the interviwer did not find a name that matched then s/he added a new record to the sibling roster. In contrast to the question for the graduate participants, selected siblings were asked "Do you have any full or half siblings who are no longer living?" If the sibling answered "yes" then a new roster was created that collected information on all deceased siblings that were reported by the selected sib. In 2005, most of the reports of deceased siblings referred to brothers and sisters who died at a very young age. Thus, many of these newly reported deceased siblings were NOT reported by the graduate because of the clause "did you grow up with." During the 2004 Graduate interview, interviewers were also allowed to delete entries in the sibling roster if the participant denied one of the siblings.

2011 Graduate and Sibling Interviews

Update of information on selected sibling/graduate

The 2011 instrument follows the same logic as the 2004 Graduate and 2005 Sibling instrument. We first update the mortality status of the selected sibling/graduate. If the selected sibling/ graduate is alive we ask about their work status, their current marital status, and location. We ask about frequency of contact, and whether they share a similar outlook on life and how close they are.

Update of sibling roster.

During both the Graduate and Sibling interviews of the 2011 wave the interviewer’s laptop displayed a list of all known siblings based on both the graduate and sibling reports from all prior waves. The list displayed the siblings names and mortality statuses. Both the graduate and sibling were simply asked if any of their brothers or sisters died since the last time we spoke. The interviewer then checked to see if the name of the deceased sibling matches any of the names we already knew. If yes, then the interviewer collected the information about the death. If the name did not match someone on the preloaded list, then the interviewer added the name and sex of the deceased sibling. Interviewers also collected the date and cause of death for the deceased sibling. For families where we completed interviews with both a graduate and a sibling we now have two different versions of the sibling roster. Specifically, the analysis variables in the 2011 wave for graduates (these variables start with the letters HK) differ from the analysis variables in the 2011 wave for siblings (these variables start with the letters KK). This is a logical consequence of asking two different people about the same thing.

Sibling Roster Analysis Variables Across the waves of the survey

Data users should know that because of the interviewer's ability to add and subtract siblings from the roster the number of siblings in the roster and the position of each sibling varies across waves. In the 2011 wave the roster variables that start with HK432/KK432 will allow matching to the roster information in the prior wave. However since the information in the sibling roster is cumulative across waves, we suggest that users use the most recent wave for which there is data.

As of the fall of 2013 WLS staff is planning on creating a harmonized sibling roster that will utilize and reconcile information from each wave.

BRIEF VARIABLE DESCRIPTIONS

KSIBSTAT, KSIBREL:	Module-Level Status Variables.
KK067SS:	Total Number of Siblings Ever Born.
KK168SC:	Number of Living Siblings at Time of 2011 Interview.
KK170S:	Have any siblings died since last interview?
KK071RE-KK073RE:	Sibling Roster Information: Graduate Respondent Position, Selected Sibling Position, Number of Siblings in Sibling Roster (including the graduate and selected sibling)

Roster Entries, one for each of up to 17 siblings. Last two digits indicate the roster number. Only the prefix is listed below.

Note: For many cases a participant's spouse or other family member was present during the interview. This sometimes resulted in the participant relying on the other person for help in answering some or many of the questions. At the end of each module the interviewer indicated the amount of help the participant received and who provided that help. That assessment is covered by codes 1 through 5. Additionally, a code of 7 indicates that the entire interview was administered to a proxy while a code of 6 indicates that this particular module was answered by a proxy but other modules were answered by the participant.

Note: For most cases gk067ss is the same as sibstt from 1975/92. If the grad was interviewed in 1975, then sibstt should indicate total number of siblings ever born at that time, else sibstt was determined in 1992-93 interview. At both interviews grads were instructed to include "siblings born alive but no longer living, as well as those alive now. Also include step-brothers and step-sisters and children adopted by your parents" in the total number. In some cases, the total number of siblings (GK073RE-1) was greater than sibstt. These cases were checked individually and were due to underreporting for sibstt due to early death of sibling. gk067ss was updated to reflect the best possible count of total number of siblings ever born.

Note: This variable is GK1331 from the previous round and is included for completeness; however entity numbers from one round have no association with entity numbers from a different round so use roster ID numbers (KKB132nn/KKB432nn) for cross-reference purposes. GK1331's INAP explanation is "Insufficient information to place oldest sib" (the sibling roster was resorted by YOB in 2004-07).
