Mail: Health Insurance Coverage

Sibling Mail: Health Insurance Coverage Module

OVERVIEW

Although new to the 2011 mail survey, the Health Insurance Coverage section is similar in scope to the Access to Health Care and Insurance Module of the 2005 telephone interview. The mail questionnaire begins by determining all types of health insurance the participant and their spouse - if applicable - are currently covered under. These types can be organized into three categories: (1) government or public health insurance that covers hospital costs or the costs of visits to the doctor; (2) private health insurance that works with, supplements, or replaces Medicare coverage to cover hospital costs or the costs of visits to the doctor; and (3) private health insurance that does not supplement or replace Medicare coverage to cover hospital costs or the costs of visits to the doctor. Next, the questionnaire determines whether the participant and/or their spouse are covered by any prescription drug insurance plans. Here, coverage under the Medicare Part D Prescription Drug Plan is given particular emphasis. If the participant is enrolled in a Medicare Part D prescription drug plan, they are asked how much - if anything - they pay in premiums for it, how they selected their particular plan, how important various factors were in their selection of it, and their satisfaction with and confidence in it. If the participant is not enrolled in a Medicare Part D prescription drug plan, they are asked about their reasons for not signing up. The questionnaire concludes by asking a series of questions about long-term care insurance initially introduced during the Health Behaviors section of the 2005 mail survey.

For the sake of comparison, see also the 2005 CATI administered Access to Health Care and Insurance Module.

A code of "inappropriate" at PINS63RE does not, however, always imply a missing value code for PINS64RE. This is because PINS63RE could have been coded as "inappropriate" due to PINS62RE having a value of "0," which is a meaningful value in terms of the amount of premium paid.
