Our Mission: “To raise awareness for need-based eye care in developing countries; To discover resources which will provide aid to the underserved; To encourage student leadership and international service in an effort to make the difference.”

* 33 million people suffer from blindness in developing countries, almost entirely due to poor health care

* 26 million of these cases can be cured through inexpensive treatments

* $20 a day can cure cataracts in one person!

Interested in making a difference? Come to our kick-off meeting to learn how you can be the solution to sight!

Tuesday Sept. 29th at 7:00 PM at Memorial Union (TITU)!
