

Population Lists

Population-Studies

This list is concerned with research and teaching in population studies, both in demography and in other subjects such as geography, sociology, development, management, planning and public policy. Information on research, conference proposals and teaching resources are all welcomed.

Leave subject line blank

In the body of the message type: **subscribe population-studies your name**
Example: **subscribe population-studies Thomas Malthus**

Archives and further information: <http://www.mailbase.ac.uk/lists/population-studies/>

Progressive Population Network List

The Progressive Population Network list is dedicated to the development of alternative ways to think about population processes, beyond the standard demographic, microeconomic and neo-malthusian perspectives, and beyond the notion that population control is a panacea for the world's problems. The list is intended to start a conversation about the strengths and weaknesses of current approaches, and about ways to incorporate and further develop the contributions of sociological, anthropological, Marxist, neo-Marxist, environmentalist and feminist theory and research to the study of population.

POPENV-L

POPENV-L is a forum for discussion and dissemination of information related to the interactions between Earth's environment and aspects of human population density, distribution, growth, and activity. POPENV-L is open to those involved in academic and policy studies of population- environment interactions, and those in advocacy and government organizations who utilize the conceptual and empirical products of this work. Participants are encouraged to discuss and disseminate theoretical and empirical information relevant to the topic, and communicate items such as bibliographic citations, book reviews, meeting announcements, initiatives, and calls for papers.

To subscribe to POPENV-L

Leave subject line blank

In the body of the message type: **subscribe popenv-l your name**
Example: **subscribe popenv-l Thomas Malthus**

Population and Environment Mailing List

This Mailing List has been created by the Population Research Center at the University of Texas at Austin to provide a forum for scholars, researchers, and others interested in research on the relationship between population and environment. The List is intended to distribute information on recent research, circulate notices of upcoming meetings, and take note of important current events. We also hope that participants will find this a useful place to share information with colleagues at other institutions. Please note that the list is monitored by the list manager.

To subscribe to Population and Environment

KZPG Overpopulation News Network

<http://www.kzpg.com/>

KZPG has a comprehensive set of email lists, an extensive web site, and discussion forums dedicated to stopping population growth. Activists, professionals and others meet to share news, discuss ideas, and work out common goals and strategies to stop population growth. A variety of email discussion groups are available on various population related topics. See the web site for information on subscribing to the lists.

NPG Population-News

The list sponsored by Negative Population Growth, Inc., will provide subscribers with population related news on a daily basis. They monitor all of the major news publications, as well as other media sources, and then pass those clips to subscribers. Daily message traffic varies according to what is in the news, but on average they distribute between four and eight messages each weekday. From press conferences to new reports, NPG Population-News list will keep subscribers up to date with the most recent information relating to immigration, population and the environment.
