Tax information was copied for 1957-1960 - the four-year

period in which their child was most likely to have been in college. If no information was available for any of these years from tax returns and if information was available for prior years (1954-1956) or later years (1961-1964), this information was used. In some cases where information was not available from tax returns, information on "net taxable" income (not adjusted gross income) was available from the tax roll books and was used
