GEOLDTH End of Life-Death Reaction Module

For more information on the End of Life-Death Reaction Module see cor853 in Appendix U.

OVERVIEW

Information about the Graduate Respondent's experiences on death of spouse or parent was collected in the following manner:

- First, if Graduate Respondent's spouse deceased within 2 years but more than 6 months ago, we ask 10 questions about the feelings on spouse's death.
- Second, if Graduate Respondent's spouse deceased within 10 years but more than 6 months ago, we ask questions on the situation of spouse's death such as how much pain did the spouse have, whether spouse had a signed living will, and changes in health insurance or pension annuities after spouse's death.
- Third, if Graduate Respondent's parent deceased within 10 years but more than 6 months ago, we ask questions on the situation of parent's death such as how much pain did the parent have and whether parent had a signed living will. If Graduate Respondents lost both spouse and parents within 10 years but more than 6 months ago, we ask about spouse's death and do not ask about parents. If mother and father died during the period, we ask about the most recent parent's death. If mother and father died at the same time, we randomly assign which parent to ask.
