

Phone: Personality

rh001re-rh010re Total scores and number of questions answered for the Five-Factor Model of Personality Structure: extraversion, openness, neuroticism, conscientiousness, and agreeableness.

rh011re-rh020re Individual questions for the personality scale.

NOTE: Because the unfolding technique was used to ask these questions (see flowchart for question format) there are a few cases where someone initially answered agree or disagree but in the follow up question did not state an intensity of this dis/agreement. In these cases, the response was coded as either "don't know" or "refused" depending on the respondent's answer.

NOTE: The response category "neither agree nor disagree" is coded as 0 for personality items. In addition, the response category "neither agree nor disagree" is not counted as an answered question in the summary items and does not contribute a value to the summary scores (RH001REC-RH010REC). This differs from coding in the PSYB module.

NOTE: See Appendix G - Cor449.DOC, MEMO114, MEMO091, and MEMO099 for references and creation of personality scales.
