

Phone: Children's Roster and Selected Child

SKID MODULE

OVERVIEW

In 1977 and/or 1994, a roster of the Sibling Respondent's children was collected. In 1977, the Sibling respondent was instructed to "... tell me the name, sex, and the month and year of birth for each of your children."

Most of the information about the children from previous interviews was preloaded in the 2005 survey. Children who were NOT biological, adopted or step relationship were omitted from the preloads.

During the 2005 interview, the Sibling Respondent was asked to confirm and update the 1977 information about children. They were also asked whether each child was biological, adopted, step, foster or some other relationship. Complete details regarding name, sex, DOB, and relationship to Respondent were obtained for any children who had joined the family since 1977. Sibling respondents were instructed to "...include biological, adopted, step or foster children as well as other children you consider to be a part of your family who have joined your family since 1975."

Sibling Respondents were also instructed to include "all children who were born alive, even if they are no longer living." This was the first time the Sibling was specifically instructed to include children who were no longer living. Although respondents had given reports of deceased children previously. The interviewers were instructed to include grandchildren in the household module if the Sibling Respondent mentioned them during this module.

Some Sibling Respondents were no longer married to the parent of stepchildren whom they had listed in a previous interview. If the Sibling respondent did not have current information about this step child and no longer considered him/her to be a part of the family, that step child was deleted from the children's roster. This deletion of previous step-children along with addition of newly acquired children either due to birth, marriage or adoption results in a modified roster for some respondents when comparing current roster to 1994 roster.

After the roster of children is constructed, the roster is ordered from oldest to youngest. Thus it is not always appropriate to compare the same roster position between 1994 and 2005. cd020n indicates the child's roster position (birth order) in the 1994 data file. (n is 01,02,03, 04,... 10)

BRIEF VARIABLE DESCRIPTIONS

cd001kd: Total number of children reported in 2005.

cd101kd: Any additions to child roster since last interview?

cd102kd: Any deceased children at time of 1994 or 2005 interview?

cd103kd: Any children living with the respondent? Table entries, one for each of up to 13 children. Last two digits indicate the table number. Only the prefix is specified below. The roster is ordered by birth date from oldest to youngest. Due to additions/deletions the same roster position may refer to a different child now than in 1994. See variable cd020 for the child's roster position in 1994.

Wisconsin Longitudinal Study Codebook

cd003: Sex of child.

cd004: Relationship of child to respondent.

cd005: Is child alive?

cd006-cd007: Month, day, year of child's death.

cd107,cda07: Cause of child's death.

cd207: Was cause of child's death from long term illness?

cd010: Recoded-highest grade of regular school child ever attended.

cd011: Did child complete the year of school in CD010?

cd210: Highest grade ever attended or degree from regular school.

cd014: Date of child's birth.

cd015: Year of survey when child originally reported.

cd017: Child currently lives with respondent?

cd018: Roster ID number of child.

cd019: Entity number of child.

cd020: Child's birth order in 1994 children's roster.

During the 1977 interview (or 1994 interview if Sibling was not in the 1977 sample), one of the Sibling's children was randomly chosen as the selected child. The selected child has one variable for each of the variables listed in the table above with sk as the suffix. The following additional information is available for the selected child:

cd009sk: Selected child's marital status.

cd104sk: Birth order of selected child.

cj002sk: State of selected child's residence.

Note: See Cor 962 in Appendix D for variable creation details

cd001kd: Total number of respondent's children. Include biological, adopted, step or foster children as well as other children respondent considered to be a part of his/her family.
