SJOBC Job Characteristics Module

OVERVIEW

The 2006 graduate-sibling job characteristics module is identical to that of the 2004 graduate instrument (see COR 850). The job characteristics module collects data on the current or last employment spell if the respondent has never retired from a job. If a respondent has retired then data is collected about the first employment spell the respondent reported retiring from.

The job characteristics module consists of two parts: the wage section and the job characteristics section. All respondents who have been in the labor force since they were last interviewed receive the pay questions (cg011jjc - cg022jjd) as well as questions about union membership (cf023jcc) and the level of government (cg026jjf) if applicable. The job characteristics questions (cg028jjc-cg058jjc) are given to the same 75% sub-sample of respondents that got them in the 1993-1994 wave.

There are five new questions in the current wave: how often respondents felt stressful at work (cg201jj) and how often they felt used up at the end of the day (cg202jj). The final three new questions are about computer usage (cg203jj and cg204jj) and Internet access (cg205jj) on the job.

Another new feature in the current wave is that up to five hazardous conditions are coded instead of only one. They are coded in the order that they were mentioned by the respondent.

The final big change in the current wave of data has to do with the construction of the base hourly wage rate. These changes follow the logic of the last wave (see cor582) but are adapted to changes in the instrument. They are documented in cor958a.rtf and cor958b.sas

BRIEF VARIABLE DESCRIPTIONS (in the order of the data set)

cg011jjc-cg018jjc:	How the respondent was paid and how much they received
cg021jjd:	Constructed base hourly wage rate
cg022jjd:	How base hourly wage rate was constructed
cf023jcc:	Union Membership
cg026jjf:	Is current job with government
cg127jj:	Flag for inclusion in 75% Job Characteristics sub-sample
cg028jjc-cg202jj:	Job characteristics
cg203jj-cg205jj:	Computer/Internet usage on the job
cg046jjc-cg053jjc:	More job characteristics
cg054jjc-cg057jjd:	Hazardous job conditions

cg058jjc: Subjective rating of job security

Note: See Cor 958 in Appendix F for variable creation details

Note: See Appendix E - COR582 Creation of Hourly Wage Rate Variables.

Note: Observations presented in cents per hour; to convert to dollars per hour, move the decimal point two places to the left.

In the public release, this variable is top-coded at \$200.00.

A reply of 0 (ZERO) does NOT mean \$0.00 per hour: a reply of 0 (ZERO) indicates a response of Other accompanied by a respondent specified answer.
