SALC - Alcohol Module

OVERVIEW

The format of the 2006 graduate-sibling alcohol module is nearly identical to that of the 2004 graduate alcohol module (see COR 849) including becoming an independent module, the 79% random sub-sample and the four new questions from the M.I.N.I. PLUS 5.0.0. Because of their similarity to each other, the variable names are equivalent between the WLS graduates and the graduate-siblings substituting 'c' for 'g' as the first letter to facilitate sibling comparisons in this wave as well as previous waves. The only difference between the two instruments is that siblings who reported zero drinking days in the past month (cu026re) were given an additional follow-up question asking if they had drunk alcohol in the past year (cul25re).

A core set of questions was asked of all respondents whether or not they were included in the sub-sample. These questions relate to the drinking habits of respondents (variables cu025re, cu026re, cul25re, cu027re, cu028re, cu029re) and if they had ever lived with an alcoholic (variables cu037re, cu038re).

Further questions about alcoholic symptoms and attitudes about alcohol use are based on the same 79% random sub-sample of respondents as it was in 1993-1994. This is the same sub-sample selected for depression experiences as well. Variable cua01re is a flag which equals 1 if respondents were in the sample and 0 if they were not.

BRIEF VARIABLE DESCRIPTIONS

| | |
|--------------------|---|
| cua01re: | Random sub-sample selection flag (ALCFLAG) |
| cu025re - cu029re: | Alcohol Use in a Typical Month |
| cu030re - cu036re: | Selected Alcohol Symptoms from the G-Mast |
| cu037re - cu038re: | Has Respondent Ever Lived with a Problem Drinker |
| cu039re - cu042re: | Lifetime Alcohol Symptoms from the M.I.N.I Plus 5.0.0 |

Note: See COR 959 in Appendix M for variable creation details

cua01re: Eighty percent random sample for depression/alcohol sections.

Data source: Sibling Respondent Collected in: 2005 Mode: phone

Note: If CUA01RE is 0, then no further questions are asked.

Religion, cognition, digit ordering, volunteer, and alcohol and depression are asked of the same sample. This variable is identical to cu001re in the Depression module.

cu025re: Have you ever drunk alcoholic beverages, such as beer, wine, liquor, or mixed alcoholic drinks?

Note: Those days refers to number of average number of drinking days (gu026re). Range is from 1 to 100 drinks.

Individuals reporting that they only drank at religious services (i.e. Communion wine) were recoded to 0. Individuals who volunteered that they had less than one drink per day (i.e. Two swallows or half a beer) were coded as 0.5.

Individuals who volunteered that they drank 1.5, 2.5, etc. drinks were recoded (rounded up) to 2, 3, etc.

Individuals who gave range (one or two), (three to five) were given the middle value. If that was not a whole number then they were subject to the previous note.
