

Phone: Employment

OVERVIEW

The employment module for the 2006 graduate-sibling instrument differs slightly from both the 1993-1994 graduate-sibling instrument and the 2004 graduate instrument. In this wave, graduate-sibling respondents were asked about up to two jobs - their current or last job (held for six months or more) and the first job they retired from. As a result, respondents who were in the labor force since the last survey fall into one of three categories. Those who had not retired from any job but were in the labor force at some point were asked about their current or last job. They are assigned inappropriate (-2) codes for the pre-retirement jobs. For respondents whose last job and job of first retirement are the same (indicated by variable *cof79re*), the information from the last job was copied into the appropriate variables for the first retirement job. Finally, respondents who first retired from a job other than their current or last job were asked about both jobs. Respondent's who had never been in the labor market are assigned inappropriate (-2) codes for the entire module.

After the roster of employment history details, respondents were asked more detailed questions about a selected employer. The selected employer was the current or last employer for each respondent.

The variable about union membership (*cf023jcc*) was in the employment module in the previous wave. Now it is asked in the job characteristics section (see COR 958)

BRIEF VARIABLE DESCRIPTIONS

cf101re: employment history summary variable

Current/Last Job Information

cf047ree & *cf050red*: start and end dates for current/last job

cf048red & *cf148red*: hours worked per week and full-time/part-time status

cfa48ree & *cf049red*: City and State of current/last job spell

cfu54red - *cf067ree*: Current/Last job Census occupation and industry codes, class of worker, occupational status and prestige scores

cf069rec - *cf170rec*: Current/Last job pension and health insurance availability and participation

cf073rec - *cf075re*: reasons left or laid off current/last job spell

cf076re - *cf078re*: Current/Last job employer details

First Retirement Job Information

cf079re: Has respondent ever retired

cf080ree & *cf081red*: Start and end dates for current/last job

cf082red & *cf182red*: Hours worked per week and full-time/part-time status

Wisconsin Longitudinal Study Codebook

cf083red - cf090ree:	Current/Last job Census occupation and industry codes, class of worker, occupational status and prestige scores
cf091rec - cf192rec:	Current/Last job pension and health insurance availability and participation
cf096re:	Whether health insurance coverage caused Sibling Respondent to remain on the job longer than they otherwise would have.

Note: See Cor 960 in Appendix F for variable creation details

cf101re: Have you ever held a full-time or part-time job lasting six months or more including starting your own business?

3 - 905	DETAILED 1990 OCCUPATION CODES	2162	2341	4503

Note: See Appendix E on occupational coding and variable construction.

Note: The number of military codes may vary for two reasons: (1) there is a difference in the coding of military occupations between the 1970 and 1990 Census, and (2) an individual may work for the military "industry" (government) as either a civilian or a member of the military. These two issues create some confusion in the assignment of the codes for "military" or "inappropriate". All cases of this type have been checked and should be assigned correctly.

(1) The number of military employees may vary between 1970 and 1990 codes for the exact same job. In 1970, all military employees were assigned to government industry and given a generic military code (ind = 917, occ = 970-973) regardless of the exact occupational tasks they performed. In 1990, the Census basis codes assigned military employees a government industry (ind = 940-960), but if they held a job that also existed in the civilian community, they were assigned a non-military occupation code. The only individuals who received the 1990 generic military occupation codes (903-905) were individuals who held jobs that only existed in the military and had no comparable civilian code.

(2) An individual could work for the military as either a member of the military or as a civilian. If the individual indicated a change in jobs within the same employer, one of those jobs could be listed as a military occupation, while the other may be listed as civilian. There are cases where the first job within an employer spell was military and the last job within the same spell was civilian, as well as the reverse situation.
