

## Phone: Parents

SPAR Parent Module

### OVERVIEW

Information about the Sibling Respondent's parent(s) was collected in the following manner:

-Mortality status of the respondent's mother was requested. If the respondent's mother was deceased, information about the date, place and cause of death was ascertained. If the respondent's mother was living, information about her health, living situation, and frequency of contact with the respondent was ascertained. For a random 50 percent sample of respondents with living mothers, information about closeness and similarity in outlook was ascertained as well. If data on the respondent's mother's date of birth or name was missing from existing records, that information was ascertained as well regardless of the mortality status of the respondent's mother. All respondents were asked the nationality of their mother regardless of her mortality status.

-Mortality status of the respondent's father was requested. If the respondent's father was deceased, information about the date, place and cause of death was ascertained. If the respondent's father was living, information about his health, whether he was currently married to and living with the respondent's mother if both were reported as living, his living situation if the respondent's father was not currently living with the respondent's living mother, and frequency of contact with the respondent was ascertained. For a random 50 percent sample of respondents with living fathers, information about closeness and similarity in outlook was ascertained as well. If data on the respondent's father's date of birth, name, or nationality was missing from existing records, that information was ascertained as well regardless of the mortality status of the respondent's father.

-Comparison questions concerning work, finances, and family were asked of a random 50 percent of respondents whose same-sex parent lived to at least age 60. A random 10 percent of respondents whose same sex parent lived to at least age 60 were also asked to a comparison question concerning education.

-Mortality status of the respondent's father and mother-in-law were ascertained if the respondent was currently married according to information collected in the interview in the marriage module.

### BRIEF VARIABLE DESCRIPTIONS

CE048RE:	Sibling in closeness/comparison sample?
CE050MA-CE061MAB:	Variables for Mother of Respondent: Year of Birth, Year of Death, Cause of Death, Nationality, Health, Residence, Contact with Sibling Respondent, Similar Outlook to Sibling Respondent, Closeness with Sibling Respondent.
CE062FA-CE073FAB:	Variables for Father of Respondent: Year of Birth, Year of Death, Cause of Death, Nationality, Health, Residence, Contact

with Sibling Respondent, Similar Outlook to Sibling Respondent, Closeness with Sibling Respondent.

CE074PAB-CE075PAC: Variables for Parents of Respondent: Married to Each Other, Same Residence.

CE076PAC-CE079PAD: Variables for Same Sex Parent of Respondent: Lived to Age 60, Similarity to Sibling Respondent in Education, Similarity to Sibling Respondent in Work, Similarity to Sibling Respondent Financially.

CE080MI: Mortality Status of Mother-in-Law if the Respondent was Currently Married.

CE085FI: Mortality Status of Father-in-Law if the Respondent was Currently Married.

NOTE: For variable creation details see cor973 in Appendix D.
