SEOLPREP End of Life Preparations Module

OVERVIEW

With some minor exceptions (listed in the next paragraph), the sibling version of the End of Life Preparations module is exactly like the graduate version. Thus, please read the COR for the graduate module (cor854EOLPrepGradPhone.doc) for information about sampling, coding, and problems experienced in preparing this module.

The only differences between the graduate and sibling versions of this module are that:

- 1) sibling variables begin with 'c' instead of 'g';
- 2) siblings don't have the 6 pattern variables -- named gyl16rec, gyl18rec, gyl20rec, gyl25rec, gyl26rec, and gyl46rec in the grad module -- which indicate which child in the child roster received a given end-of-life instruction;
- 3) for siblings, variables cy016re, cy018re, cy020re, cy025re, cy026re, and cy034re through cy038re are based on raw variables (wpa4a, wpa4d, wpa4g, wpb2, wpb3, and wpc1_a through _e) that have slightly different answer categories here than in the grad or grad-spouse versions. Specifically, the "CHILD/CHILD-IN-LAW/GRANDCHILD" category was replaced with 6 separate categories in the sibling instrument: DAUGHTER, SON, DAUGHTER-IN-LAW, SON-IN-LAW, GRANDDAUGHTER, and GRANDSON. The difference between sibling and other versions is, ultimately, relatively minor, since open-ended coding was used to identify sons, daughters, etc. in a large proportion of cases for grads and grad-spouses. But for siblings, unlike grads or grad-spouses, the catch-all category "CHILD/CHILD-IN-LAW/GRANDCHILD" is completely eliminated.

The EOL questions were administered to a randomly selected 70% subsample to reduce the overall length of the survey. However, all siblings who were Wiscville residents were asked these questions, because, in the mid-1990s, major health care organizations in this area implemented a large-scale advance directive education program. Siblings were considered to be in the Wiscville sample if they lived in the Wiscville area 1) at the time of the 1993-1994 survey or 2) at the time of the 2003-2005 survey.

BRIEF VARIABLE DESCRIPTIONS

cy001re:	Wiscville resident flag (100% of Wiscville residents will get this module).
cy002re:	EOLFLAG for sample selection (70% of respondents will get this module, except for Wiscville residents, who are sampled at 100%, as mentioned).
cy003re:	Has Sibling respondent made *any* preparations for end of life? (i.e., positive response to at least one of cy004re, cy010re, cy020re, and cy030re.)
cy004re:	Has Sibling respondent made medical plans in case of future serious illness?

Wisconsin Longitudinal Study Codebook

cy010re-cy021re: Sibling respondent's discussion of health care plans and preferences (With anyone? Spouse? Kids? Whom? How well does person understand?).

cy022re-cy026re: Legal arrangements for someone to make decisions about Sibling respondent's medical care (Any? Who has, or would have, that authority? Spouse? Kids?).

cy030re-cy038re: Sibling respondent's living will or advance directive (Exists? Given to spouse? To kids? To whom?).

cy040re-cy046re: Inheritance plans (Who would get Sibling respondent's assets? Does Sibling respondent have will? Etc.).

cy060re-cy062re: Sibling respondent's hopes/plans for last days or weeks of life (Where spent? Discontinue treatments?).

cy065re: How strictly to follow Sibling respondent's wishes for end of life medical care.

cy070rec: At what stage in the Terri Schiavo case did Sibling respondent complete the WLS phone survey?

Note: See Cor 929 in Appendix U for variable creation details

cy001re: Is respondent a Wiscville resident?

Note: "Wiscville" is a pseudonym for a hospital referral region in Wisconsin in which, in the mid-1990s, major health care organizations implemented a large-scale advance directive education program. Siblings were considered to be in the Wiscville sample if they lived in the Wiscville area either at the time of the 1993-94 survey or at the time of the 2003-2005 survey.

cy002re: Flag indicating if Sibling Respondent is in 70% End-of-Life Sample. Does not apply to Wiscville residents, since 100% of them will get the End of Life modules.

Note: This variable is set to 1 "YES" if "spouse" is mentioned in CY016RE, CY018RE, or CY020RE (i.e., if any of those variables are set to 1 SPOUSE; 2 SPOUSE AND CHILDREN; 167 SPOUSE AND OTHER RELATIVES; 169 SPOUSE, KID(S), & OTHER RELATIVES; 170 SPOUSE AND NONRELATIVES; or 172 SPOUSE, KID/GKID & NONRELATIVES). It is set to "NO" if none of the people mentioned in those variable is the spouse. It is set to -2 "INAPPROPRIATE" if no spouse is mentioned and any of the three constituent variables is -1 or -3, or if this question doesn't apply because R is not in the End-of-Life sample or didn't discuss health care plans with anyone. In a few (very rare) cases, respondents who in our records are not currently married nonetheless list a spouse. These cases are retained.

Note: This variable is set to 1 "YES" if one or more children (including stepchildren) is mentioned in CY016RE, CY018RE, or CY020RE (i.e., if any of those 3 variables is set to 2 SPOUSE AND CHILD/CHILDREN; 10 SON; 11 MULTIPLE SONS; 12 DAUGHTER; 13 MULTIPLE DAUGHTERS; 14 CHILD/CHILD-IN-LAW/GRANDCHILD (M or F); 15 MULTIPLE CHILDREN (GENDER UNSPECIFIED); 16 MULTIPLE CHILDREN, MIXED SEX; 46 STEPSON; 66 STEPDAUGHTER; 70 SON AND DAUGHTER-IN-LAW; 71 DAUGHTER AND SON-IN-LAW; 72 MULTIPLE CHILDREN AND CHILDREN-IN-LAW; 73 CHILD(REN) AND STEPCHILD(REN); 168 CHILDREN AND OTHER RELATIVES; 169 SPOUSE,KID(S),&OTHER RELATIVES; 171 MULTIPLE: KIDS/GRANDKIDS & NONRELATIVES; or 172 MULTIPLE:SPOUSE, KID/GKID & NONRELATIVES).

This variable is set to "no" if none of the people mentioned in CY016RE, CY018RE, and CY020RE is a child. It is set to -2 "INAPPROPRIATE" if any of the three constituent variables is -1 or -3, or if this question doesn't apply because R is not in the End-of-Life sample or didn't discuss health care plans with anyone. In rare cases, respondents who according to our records are childless may nonetheless name a child. These cases are retained.
