

Phone: Selected Sibling

SSIB - Sibling Module

OVERVIEW

This respondent was chosen during an interview of his/her sibling who graduated from a Wisconsin high school in 1957. During an interview in 1975, the 1957 graduate was asked to list each of his/her siblings and then one of these siblings was randomly chosen as the "selected" sibling. In this module, questions are asked of the respondent (sibling who was randomly chosen in 1975) about his/her sibling. The sibling in this module now refers to the 1957 high school graduate, who is referred to as "graduate" in this module.

If this graduate is deceased, then information about cause and year of death is collected; and if the deceased graduate was not interviewed in 2004, details regarding his/her last job are also ascertained. In addition, for living graduates who were not interviewed in 2004, marital status and current labor force status are collected. Contact, closeness, and comparison questions are asked of all siblings if the graduate is alive.

A small portion of the siblings were asked to give death details about any "full or half siblings who are no longer living." In 1975, the graduate was asked to report total number of siblings ever born and list a few details about each living sibling. In 2004, an attempt was made to learn about mortality status of all biological siblings by asking "Did you grow up with any siblings who are no longer living?" Any deceased siblings who were newly found via this death question were added to the 2004 sibling roster in the graduate instrument and coded deceased. There are still about 800 cases in which the number of siblings ever born (gk067ss) is greater than the total number of siblings in the roster (gk073re). In order to reconcile these differences, the selected sibling of the corresponding graduate was asked to list any "full or half siblings who are no longer living". cka01ss indicates if the sibling was asked about deceased siblings. Any siblings who were not already included in the roster of siblings provided by the graduate were kept in variables ck0021-ck1334. All of these siblings were deceased prior to 1975 and many of them died at a very young age. Thus the graduate did not count them as "siblings whom they had grown up with".

BRIEF VARIABLE DESCRIPTIONS

- ck069s: Sibling Respondent grew up with any brothers or sisters who had a disability or mental illness?
- ck001ss-ck008ssc: Mortality status; year of death and cause of death for deceased graduate.
- ck009ssc-ck027ssc: For deceased graduates: details about usual work including COW, 1990 census codes, major occupation and industry codes, Nakoa-Treas Prestige Rating, 1990 occupational education and occupational income scores, and year graduate stopped working at this job.
- ck034ssd,ck036ssd: For those graduates who did not respond in 2004 and are alive: graduate's marital status and current work status.

ck057ssd-ck060ssg: Frequency of contact sibling respondent has with graduate, or date respondent last saw graduate.

ck061ssd-ck062ssd: Similarity of sibling respondent and graduate on general outlook and closeness.

ck063ssd-ck065ssd: Comparison of respondent and graduate in terms of education, work, and finances.

cka01ss: If the sibling was asked about deceased siblings.

ck0021-ck1334: Additional reports of biological sibling deaths: year of death, age at time of death, cause of death, sex, and entity number of deceased sibling.

Note: See Cor 961 in Appendix D for variable creation details

ck069s: Did you grow up with any brothers or sisters who had a disability or mental illness?
