

## Phone/Mail: ICD-10 Variables

SICD10 ICD-10 Variables

### OVERVIEW

There are 59 ICD-9 variables in the 2005 sibling phone and mail interview. The variables in this module are simply a recode of these 59 ICD-9 variables. That is, a conversion mapping was applied to change the code to ICD-10. The sibling's original response was not reviewed for the ICD-10 variable.

Please note that the original ICD-9 variables also include ICF codes and ICD-9 Volume 3 codes. There are no ICD-10 equivalent for these codes and thus are coded -2 (inappropriate). Also, there is no collapsed version of these (mostly private) ICD-10 variables. Since the collapsed ICD-9 codes are public and the code scheme is somewhat arbitrary, there is no need for a collapsed ICD-10 variable.
