For more information on the Income Module see Appendix L - Cor924.

OVERVIEW

Sibling spouses were asked to provide information on their own income from the following sources: wages/salaries, business/farm, social security, pensions, SSI/public assistance/other government programs. If the sibling indicated that the spouse is more knowledgeable about finances (CR086RE,) the spouse was also asked about interest/dividend income. Unlike in the sibling interview, questions about other income were not asked.

As in the sibling interview, unfolding brackets followed questions asking for dollar amounts in this section. Associated with these items are four variables (identified by the eight characters of the variable name) detailing the information collected in the bracketing sequence. The character "b" is associated with a summary variable, "u" and "l" denote the upper and lower bounds and "e" indicates the entry point into the bracketing sequence. Upper bound of infinity is denoted by a special missing code - ".i" in Stata, "I" in SAS and system missing in ASCII datasets.

During the interview, interviewers had a chance to leave notes with additional information obtained from the respondents. The WLS staff reviewed and processed these notes using a standardized set of decision rules for each section). In many cases processing the notes resulted in changes to the coded responses which created inconsistencies in the skip pattern of the CASES instrument. While we put considerable effort into adjusting such discrepancies, we could not eliminate them all. Occasionally, notes indicated problematic cases due to the lack of specific information or, conversely, cases that contained extra information that was important enough to retain. In such instances we created a flag, identified by the character "f" and attached it to the variable name, for the affected variable.

BRIEF VARIABLE DESCRIPTIONS
