1	YES	4316	4648	8964

Note: If year last attended school is greater than 1975, questions about the first job after completing school are not asked. These cases are coded 9 for JOBED and all the following questions about first job. There were nine cases with missing data for year job began. Only one of these respondents reported any education after high school and the last year attended for that respondent was 1964. So all nine of these respondents were coded as if this first job had begun prior to 1975.

Note: For 475 people who did not respond in 1975, their current job is the job held in January, 1975.

This code divides occupation into broad categories derived from occupation, industry and class of worker. (Group II occupation is the name used for this variables in the OCG II codebooks.)

See Change Notice #18 for difference between updated and original variables.

This 9/99 update includes codes for 46 respondents previously coded "998" - Inappropriate for this variable.

Five respondents indicated they were not employed as of 1/75 in response to bb07. They later reported having a job spell that included the time period 1/75. We have coded their data exactly as they reported it - ie. variables INXCURU through OCPXCRU2 in Wave 1 are coded inappropriate and variables in Wave 2 have a job spell that includes 1/75.

This variable is the proportion of months from June, 1957 to the month of interview that R was not known to be out of the civilian labor force.

It was constructed in a complex fashion from R's reports of educational and military experience, weeks worked in 1974 and, in the case of ever-married females, work in marriage-birth intervals. See

Appendix E - Memo043 for construction of EXPER and TENURE and COR331a

for the updated versions NEWEXPER and NEWTEN.
