bmfaedu constructed from EDHHYR if possible, if not available take from EDFA57Q.

For EDFA57Q, number of years of schooling was estimated based upon categorical responses to "highest level attained." These are the possible responses with code for years in parens: Did not attend high school (7); Attended high school (10); Graduated from high school (12); Attended trade or business school (13); Attended college (14); Graduated from college (16); Has master's or PhD (18).

Note: The original question ascertaining family income was coded as two variables -- YFM57, dollar earnings of family; and YFRRT5, family's income reported at what rate. The codes for YFRRT5 were as follows:

1 = per hour

2 = per day

3 = per week

4 = per two weeks

5 = per month

6 = per year

7 = Don't know

8 = Inappropriate, no income

9 = Not ascertained or nonrespondent

If YFM57 was coded not ascertained, YRML57 was coded 9999. If YFM57 was coded don't know,

YFML57 was coded don't know. If a dollar response was given to YFM57 but YFRRT5 was not

ascertained, YFML57 was coded 9. If a dollar response was given to YFM57 but YFRRT5 was coded

don't know, YFML57 was coded 7.

See Appendix E - COR713 and MEMO133 for creation of major industry, major occupation, status, and prestige.

It should be noted that this grouping of occupations (occupational categories) is different from the other "major occupation groups" appearing in most parts of the codebook. In order to classify occupations into "major occupation groups," information on occupation, industry, and class of worker is required.

Whenever industry or class of worker is not ascertained for a particular job, the grouping of occupations is the occupational grouping from the 1970 Census.
