Note: In the public release, this variable was top-coded at \$500,000.

If the respondent reported giving money to at least one child, but responded with don't know or refused to all questions about amount given, then the code for SQ024KD is 99999996. If the respondent replied with don't know to all questions about transfers to children, then SQ024KD is coded 99999997. If the respondent refused to answer any questions about transfers to children, then SQ024KD is coded 99999999.

Note: For each transfer, we know the birth order of the child (SQ027nn), whether or not the child is the selected child (SQ028nn), the sex of the child (SQ029nn), the amount of money transferred to the child (SQ030nn), why the child received money (SQ031nn) and the most recent year child received money (SQ032nn).

There are 13 sets of these variables. SQ026KD indicates how many have valid entries;nn is the table number. Table entries are in descending order by amount child received. Missing values for amount are at the end of the table. If the respondent replied with don't know to all questions about transfers to children, then all variables in the table are coded "don't know". There are 5 cases of this type. If the respondent refused to answer any questions about transfers to children, then all table entries

are coded "refused/ not ascertained". There are 125 cases of this type.

The survey instrument allowed for transfers to children for each of these reasons: down payment on a home (3), enter or continue business or farm (3), increase wealth or decrease debt (3), medical expenses (4), housing or other living expenses (4), educational expenses (3), and other (4). The number in parenthesis indicates maximum number of transfers allowed for that reason. The total number of transfers in the actual data was 13.

Note: The respondent was asked to give the name of the child to whom a transfer was made. An attempt was made to match this name with the child's name associated with the variables in XKROS using a program. 95% of the cases were either a match or a refusal to give the name by the respondent. Refusals and those names which could not be matched are coded 99 for SQ027. If a match was found then SQ027 is coded 1-10 and additional characteristics of this child can be found by using SQ027 as the table number for variables SD003 - SD015 in XKROS.
