Note: The highest equivalent educational level reported for SB003RED may not use the latest degree obtained. Some respondents received "lower" degrees after their 1977 interview (for example, a respondent with a Bachelor's degree returned to school for an Associate's degree.) Use SB004RED to get the equivalent educational level for the most recent degree obtained.

If there was no schooling for 1977 respondents after 1977, they received the same code they had in XEDEQYR. If 1977 Rs had schooling after 1977 but did not earn a degree, they received either XEDEQYR or 12+(# years college), whichever was higher.

Please note that SB003RED adds a category, 21, for post-doctoral education, while the comparable variable from 1977, XEDEQYR, lumps post-doctorates into the 20 year category.

Note: 1977 NRs who answered only the mail questionnaire were not asked about any courses taken after obtaining highest degree.

Date respondent FIRST attended college after receiving most recent degree is only available for those who received a degree and took post-degree courses after 1977. Please note that this is different from SB027REE and SB029REE, where information about post-degree college attendance is available if the respondent took ANY courses after 1977.

Starting dates were not obtained in 1977 for post-degree courses.

Therefore, if a 1977 respondent did not receive a degree after 1977, we have no starting dates from the earlier data to use as a fill for this variable. Post degree college information were not obtained if attended for less than one year for 1977 non-respondents.

All dates for education were asked by season and the mid-point of each season was selected for the data.

(Summer = July; Fall - Oct; Winter = Jan; Spring = April)

See Appendix O - COR607, Century Months.

sb029ree: Century month last attended college or university after obtaining most recent degree. Only available for those who took post-degree courses since they were last interviewed in 1977 or who are 1977 nonrespondents.
