

## Phone: Household Roster

se001he Total number of persons living in the household.

The table allows for up to eleven household members. The last two digits of the variable indicate the table number. The prefixes are:

se002	Living arrangement of household member.
se502	Living arrangement of household member, collapsed.
seu03	Section of the questionnaire from which information for this household member was obtained.
se004	Relationship of household member to respondent.
se005	Age of household member.

The household roster contains one table entry for each person who lives in the household. The respondent is always the first household member. If the respondent is married, the spouse is the second household member.

If any of the respondent's children are coded as living at home (question 126g) or living at college/school/dorm/university, these children are included in this newly constructed roster next. No further questions were asked to determine if children living at college still live with R part-time. In the income module, several respondents reported income for children whom they had indicated were living at college. This indicates these children still live at home part-time. To be consistent, all children living at college are included in the household roster, with a unique code of "14" for se002.

If anyone other than a spouse or children lived with the respondent, information about those individuals was reported in questions Ha1 through Hg7 of the questionnaire. These individuals are included in the household roster next. Some mothers are coded 996 for question 466f (code 996 indicates mother lives with respondent), but not listed in questions Ha1 - Hg7. These mothers are included in the household roster next and coded "04" for seu03. Fathers who are coded 996 for question 472f, but not listed in questions Ha1 - Hg7 are also included in the household roster with a code of "05" for seu03. Parents who are listed in questions Ha1 - Hg7 have a code of "06" for seu03.

### Parents' Variables

se048re	Is R in random sample to be asked questions about contact, closeness with parents?
se049pa	Did respondent live with both parents most of the time up to the age of 16?
se050ma-se054ma	Variables for MOTHER of respondent: mortality status, year of birth, year of death, cause of death, state of residence at time of death.
se055fa-se059fa	Variables for FATHER of respondent: mortality status, year of birth, year of death, cause of death, state of residence at time of death.
se060pa	Are parents still married to each other.
se061ma-se064ma	Variables for MOTHER of respondent: frequency of contact during past 12 months, similar outlook on life, closeness. (random 50% sample)
se070fad-se073fab	Variables for FATHER of respondent: frequency of contact

during past 12 months, similar outlook on life, closeness.  
(random 50% sample)

se076pac-se079pad Variables for SAME SEX PARENT of respondent: lived to  
respondent's current age, comparison to R in terms  
of education, comparison to R in terms of work,  
comparison to R financially. (random 50% sample)  
se080mi Mother-in-law alive at time of interview.  
se085fi Father-in-law alive at time of interview.

**se001he: Number of household members. Includes the respondent.**
