

Phone: Other Income Summary

sp001re - sp003re	Respondent's income from wages and self-employment in the last 12 months.
sp004sp-sp006sp	Spouse's income from wages and self-employment in the last 12 months.
sp007rp-sp023rp	Respondent or spouse's income from interest/dividends, social security, pensions, annuities, public assistance, other government programs, child support, alimony, or any other source in the last 12 months.
sp024rp-sp027rp	Amount of child support or alimony paid by respondent or spouse in the last 12 months.
sp028rp-sp029rp	Total amount of income received by respondent and spouse in the last 12 months.
sp030hh-sp044hh	Other members of respondent's household (besides respondent and spouse) who received income from wages, salaries, commissions, or self-employment in the last 12 months. These variables indicate relationship to respondent, amount of income, and position of this person in the household roster.

The survey instrument to collect data for other income for the siblings was substantially different from the instrument for the graduates.

The main differences were that:

- a. Reports of all income except wage, salary and self-employment were collected together for the spouse and sibling in the sibling survey. In the graduate survey, separate reports for graduate and spouse were obtained for wage, salary and self-employment income just as in the sibling survey. However the questions regarding all other types of income were asked so that the graduate could combine his/her amount with spouse's or report separate amounts.
- b. For the sibling survey, amounts of income for other household members are only obtained for wages, salary and self-employment. In the graduate survey, the graduate was asked to report on wages, salary, and self-employment for up to 5 other household members; as well other types of income for up to 2 other household members. (If graduate gave separate reports of his/her income and spouse's income for these other types of income, then there was only space to report that type of income for one other household member.)

Thus the variable names in this module do not correspond with the names in the OINC module for the graduates; and the user should use caution when comparing household incomes of siblings and graduates.

An overview of questions regarding receipt of income from the sibling Q file:

- Sib asked to report own income for wage, salary, and self-employment in a separate question for each type of income.
- Sib asked to report income of spouse for wage, salary and self-employment in separate questions for each type of income.
- Sib asked to report several other types of income (including interest, social security, pension, child support, inheritance, public assistance and any other) for sib or spouse. There were separate questions for each type of income - but no distinction was made between sib's or

spouse's income.

Sib asked to report any wage, salary and/or self-employment income received by any one else in the household. Up to 5 other household members could be indicated - relationship and if appropriate name were given. Wage, salary, and self-employment were lumped together.

Imputed data for a subset of variables in this module are available in "Ancillary Data: Economic Imputations"

sp001re: Respondent's income from wages, salaries, commissions, and tips before taxes and other deductions in the last 12 months.

Note: Refused/not ascertained and don't know responses are counted as 0 for this sum. SP029RP indicates the number of missing amounts. If respondent or spouse had a business loss, the amount of this loss is not reported. Zero is used as the amount for the sum in SP028RP and these cases are also included in the missing count in SP029RP. In the public release, SP028RP is topcoded at \$500,000.

sp029rp: Number of missing items included in summary of respondent and spouse's total income, SP028RP.
