

Phone: Psychological Well-Being

This section contains total scores and number of questions answered for the Psychological Well-Being Scale: autonomy, environmental mastery, personal growth, positive relations with others, purpose in life, and self-acceptance.

NOTE: Most variables in this section were recreated for the 3/98 release of the Wisconsin Longitudinal Study: 1993/94 Sibling Telephone and Mail Surveys - WLS23S_2

NOTE: If using the psychological well-being items from both the telephone and mail surveys (WLS23SM), note the different coding schemes used for the two instruments.

NOTE: For siblings who were also in the original WLS graduate sample, the values for the following variables were taken from the 1992/93 Graduate Phone Interview (and hence the source variables often include corresponding variables with prefix "RN").

sn001re	Was this respondent randomly selected to answer psychological variables.
sn002red,sn003red	Total score for autonomy and number of autonomy questions answered.
sn004red,sn005red	Total score for environmental mastery and number of environmental mastery questions answered.
sn006red,sn007red	Total score for personal growth and number of personal growth questions answered.
sn008red,sn009red	Total score for positive relations with others and number of positive relations questions answered.
sn010red,sn011red	Total score for purpose in life and number of purpose in life questions answered.
sn012red,sn013red	Total score for self-acceptance and number of self-acceptance questions answered.
sn014red,sn015red	Total score for psychological well-being and number of psychological well-being questions answered.
sn016rec-sn027rec	Individual questions for the psychological well-being scale.

NOTE: In releases prior to 3/98, if the respondent answered "neither agree or disagree" to an individual component of the well-being scale, it was treated as missing data along with "don't know", or refused. The updated total scores (sn002red-sn015red) assign a mid-point (4) to the "neither agree or disagree" response. The individual questions (sn016rec-sn027rec) have also been recoded to 4 for the "neither agree nor disagree" category. This differs from coding of similar items in the XPERTS module. See Change Notice #13 for details.

NOTE: Because the unfolding technique was used to ask these questions (see flowchart for question format) there are a few cases where someone initially answered agree or disagree but in the follow up question did not state an intensity of this dis/agreement. In these cases, the response was coded as either "don't know" or "refused" depending on the respondent's answer.

NOTE: See Appendix K - COR574A and COR437 for details regarding creation

of the psychological well-being scores.

NOTE: Variables np001rec-np068rer in WLS23SM contain more detailed variables measuring the same concepts.

sn001re: Respondent is in 80% Random sample for Psychological Well-Being.

Data source: Sibling Respondent Collected in: 1993-94 Mode: phone
Source variables: RN15, RN001RE

Value	Label	Frequencies

See SN014REI for an alternate version of this variable in which missing values are replaced by mean of valid components prior to summing.

sn014rei: Summary score for Psychological Well-Being, mean imputed for missing components.

Data source: Sibling Respondent Collected in: 1993-94 Mode: phone

Source variables: SN001RE, 438s, 439, 440, 440b, 440m, 440p, 440s, 442, 442b, 442m, 442p, 442s, 443, 441, 488g, 488j, 488m, 488p, 490, 490b, 490m, 490p, 492f, 492j, RN014RED

Revisions: Added Jan 2008

Value	Label	Frequencies		
		Male	Female	Total
.	System missing - NR	2113	1861	3974
-3	Refused, Not ascertained, < 6 valid responses to components of sum	38	29	67
-2	INAPPROPRIATE INAPPROPRIATE, SECTION SKIPPED (SN001RE = 0)	451	514	965
31 - 62		410	413	823
63 - 69		459	459	918
70 - 74		435	486	921
75 - 79		363	396	759
80 - 84		168	183	351

Note: If fewer than 6 of the components have valid responses, the score is -3. If 1-6 scores are missing, the mean for each missing components is imputed from the mean of all valid components for that case. See sn015red for the valid number of components.

sn015red: Number of Psychological Well-Being items answered.
