Summary

sa012rem–sa013rey Dates of 1993–1994 telephone and mail interviews.

sa014re   ID number of the person who interviewed the 1993–1994
                   telephone respondent.

sa015re–sa016re   State and zip code of respondent's address in 1993–94.

sa021re–sa025re   FIPS,LMA, MSA and county population for respondent's
                   address in 1993–1994.

sa026re   IDPRIV of this sibling respondent as a graduate.

sa027re   Is this sibling the parent of a child with a disability?

sa029re   Age of sibling respondent at time of 93–94 interview.

xsmr93f, xr93idus Sibling have relationship with another sibling?

NOTE: All siblings who were interviewed in 1977 and all siblings
of graduates who completed the telephone interview in 1992/93 were
scheduled to be interviewed by telephone in 1993–1994. Addtionally, siblings
who completed the 1993/94 telephone interview were to be sent a mail
questionnaire. Due to budget constraints, it was not possible to complete
all these interviews. Telephone interviews were attempted for:
  1. All those siblings who were interviewed in 1977, xstat77=1;
  2. All other siblings from groups 2–9 (group91 = 2–9), if the graduate
     completed a telephone interview in 1992/93 (stat92p=1).
Mail questionnaires were sent to the remaining 970 siblings from groups
0 and 1 (if the respondent completed the telephone interview). These
mail questionnaires contained two additional pages ascertaining information
about marriage, current job, children, birthdate, education and spouse's job.
561 of these siblings returned the mail questionnaire, xstat93m=2.

26 graduates who were interviewed in 1992/93 are also siblings of other
graduates. These respondents were not interviewed as a part of the sibling
survey. However, their data from the original sample survey conducted
in 1992/93 was added to this data set. These 26 respondents have code "5"
for xstat93m. Their idpriv as a graduate is in sa026re.

This module contains data for the 4778 respondents to the 1993/94 telephone
survey; data for the 561 respondents from groups 0 and 1 who received
the mail only survey; and data for the 26 graduates who are also siblings of
graduates.

sa006re: Did respondent complete part or all of the phone interview?

Data source: Sibling Respondent   Collected in: 1993-94   Mode: phone
Source variables: otc
Revisions: Updated 1/99

Value	Label	Frequencies		
		Male	Female	Total
.	System missing - NR	1856	1557	3413
-2	INAPPROPRIATE INAP, NO PHONE INTERVIEW COMPLETED	257	304	561
1	COMPLETED QUESTIONS FOR ENTIRE PHONE INTERVIEW	2255	2422	4677
2	PARTIAL, COMPLETED QUESTIONS AT LEAST THROUGH dend, REMAINING QUESTIONS CODED REFUSED	60	39	99
3	COMPLETED QUESTIONS FOR ENTIRE PHONE INTERVIEW, HOWEVER MANY RESPONSES ARE DON'T KNOW AND OTHER RESPONSES MAY BE INCORRECT (SEE NOTE BELOW)	1	1	2
4	COMPLETED QUESTIONS FOR ENTIRE 1992/93 GRADUATE PHONE INTERVIEW	8	18	26

Note: The interviewers indicated that the responses from two respondents may not be reliable. For one case "The respondent wavered between complete cognition to incomprehension of the questions. Interviewer recorded don't know if the answers made absolutely no sense." For the other case: "The respondent has a brain tumor and had surgery. He could remember only certain things (i.e. he gave information for the only job he could remember, not necessarily the most recent job). The interviewer was one of our best, and he thinks that the information that is actually there is accurate but a lot of it is "don't know" especially in the financial section." Both of these cases are code "3" for SA006RE.
