Research Experience

Database Management and Creation – I have worked with large criminal history databases and social science databases. I also helped create and manage a national survey database, qualitative coding databases, and a sports statistics database.

Surveys – I have designed, conducted, and analyzed multiple surveys, both independently and in collaboration with a team of researchers.

Qualitative Interviews – I have conducted, coded, and analyzed interviews, both independently and in collaboration with a team of researchers. These interviews involved criminal justice actors, as well as at-risk populations of probationers and prisoners.

Quantitative Methods Training and Experience

Multivariate regression models
Hierarchical Linear Models (HLM)
Difference in Difference (DiD) models
Fixed effects models
Instrumental Variable (IV) analysis
Mediation analysis
Survival analysis
Regression discontinuity
Propensity score matching
Logistic regression
Log-linear and association models
Latent class models
Finite mixture models

Computer Programs

STATA, SPSS, lem, Latent Gold, Tableau Public
