GDEPR Depression Module

OVERVIEW

Information about the Graduate Respondent's depression experience was collected in the following manner:

- In 2004, life-time experiences of depression have been asked to Graduate Respondents who were randomly selected to answer on alcohol consumption and depression experiences (ALCFLAG = 1). The random sample selection flag GU001RE in this module is identical to GUA01RE in the Alcohol module.
- This 2004 questionnaire is replicate of 1993 survey and they share same data structure.

If a valid yes or no response is given for fewer than 4 of the 7 symptoms in gu006re to gu012re then gu024re is coded -3. Gua24re indicates the number of valid responses.

The code 0 includes those who have never experienced a period of depression according to response in gu002re.

The -2 code includes those whose depression always caused by alcohol, drugs, medications, or physical illness, gu003re=1.
