GHH Household Module

For more information on the Household Module see Appendix D - cor876.

OVERVIEW

Information about the Graduate Respondent's household was collected in the following manner:

- Information regarding the respondent, spouse, children, and parents was gathered in separate modules. Information regarding other household members was gathered in the household module.
- The respondent was asked if anybody lives in their household other than individuals discussed previously in the interview.
- For each additional household member, the respondent was asked for the individual's relationship to the respondent, name, sex, age, and length of time living together.
- After information was collected on each additional household member, the respondent was asked if anybody other than the respondent, spouse and children in the household had a physical or mental condition, illness, or disability. If so, details of this condition were gathered.

BRIEF VARIABLE DESCRIPTIONS

The roster allows for up to nine household members. The last two digits of the variable indicate the table number. For example, GE00501 tells the age of the first household member; GE00502 tells us the age of the second household member.

Note: This is coded to ICD-9 and ICF classifications. See COR867 in Appendix R for ICD-9 codes as well as details regarding ICD-9 coding.

This question was not asked of children. The WLS obtained only non-normative information for children, and this is not included here.

Due to an instrument design error, this was only asked of parents if a household member was added in the household module (i.e. hhinit = 1).

Note: Please see the 'Phone/Mail: ICD-10 Variables' module for the ICD-10 version of the ICD-9 codes in this variable.

ge00602: First most serious physical or mental condition, illness, or disability of 2nd household member. These are ICD-9 and ICF codes.

This question was not asked of children. The WLS obtained only non-normative information for children, and this is not included here.

Due to an instrument design error, this was only asked of parents if a household member was added in the household module (i.e. hhinit = 1).

Note: Please see the 'Phone/Mail: ICD-10 Variables' module for the ICD-10 version of the ICD-9 codes

in this variable.
