GKID Kid Module

OVERVIEW

In 1975 and/or 1993 a roster of the Graduate Respondent's children was collected. In 1975, the Graduate was instructed to "... tell me the name, sex, and the month and year of birth for each of your children."

In 1993, those Graduate's who had participated in the 1975 study were asked to confirm and update the 1975 information about children. They were also asked whether each child was biological, adopted, step, foster or some other relationship. Complete details regarding name, sex, DOB, and relationship to Graduate were obtained for any children who had joined the family since 1975. Graduates were instructed to "...include biological, adopted, step or foster children as well as other children you consider to be a part of your family who have joined your family since 1975."

Graduates who were not interviewed in 1975 were asked "Do you have any children? Please include biological, adopted, step or foster children as well as other children you consider to be a part of your family."

Most of the information about the children from 1975 and/or 1993 interviews was preloaded in the 2004 survey. Children who were NOT biological, adopted or step relationship were omitted from the preloads. During the 2004 interview, the Graduate Respondent was asked to confirm and update the previous information; and asked about any other children not already listed: "Please include biological, adopted, or step children, as well as other children you consider to be a part of your family. Also include all children who were born alive, even if they are no longer living." This was the first time the Graduate was specifically instructed to include children who were no longer living. Although respondents had given reports of deceased children previously. The interviews were instructed to include grandchildren in the household module if the Graduate Respondent mentioned them during the GKID questions.

Some Graduate Respondents were no longer married to the parent of step children whom they had listed in a previous interview. If the Graduate did not have current information about this step child and did no longer considered him/ her to be a part of the family, that step child was deleted from the children's roster.

This deletion of previous step-children along with addition of newly acquired children either due to birth, marriage or adoption results in a modified roster for some respondents when comparing current roster to 1993 roster. After the roster of children is constructed, the roster is ordered from oldest to youngest. Thus it is not always appropriate to compare the same roster position between 1993 and 2004. gd020n indicates the child's roster position (birth order) in the 1993 data file. (n is 01,02,03, 04,... 10)

During the 1975 interview (or 1993 interview if Graduate did not respond in 1975), one of the Graduate's children was randomly chosen as the selected child. The selected child has one variable for each of the variables listed in the table above with sk as the suffix. These additional variables are available for the selected child:

GD002SK: Is the Selected Child in 2003-05 the Same Child Selected in 1975?

GJ002SK: State of Selected Child's Residence.

GJ021SK-GJ038SK: Selected Child Currently Working, Ever Worked, Class of Worker, 1990 Census Codes, Major Occupation and Industry Codes, Nakoa-Treas Prestige Rating, 1990 Occupational Education and Occupational Income Scores.
