

Mail: Dealing With Problems

Sibling Mail: Dealing With Problems Module

OVERVIEW

This module almost perfectly replicates the Dealing With Problems section of the 2005 mail survey. It presents the participant with 17 potentially stressful life events/problems and asks for the following information: (1) if the participant has ever experienced the event, (2) age at first (or only) occurrence, and (3) age at most recent occurrence. Based on this information, four summary variables are constructed for each event:

PD__CRE: Did the participant ever experience this event?
PD__ARE: Age at first/only occurrence
PD__BRE: Age at most recent occurrence
PD__DRE: Did the participant provide an illogical age pattern?

Each life event/problem is indexed by a different number sequence. Life-threatening floods, fires, storms or other disasters, for example, are denoted by "004". Thus, the summary variables associated with them are as follows: PD004CRE, PD004ARE, PD004BRE, and PD004DRE.

In addition to this information about participants' experiences with specific life events/problems, additional items (18) focus on coping strategies and/or reactions to difficult or stressful life events in general.

BRIEF VARIABLE DESCRIPTIONS

Variable ranges reference dataset/codebook order and are not necessarily alphabetical.

PD001CRE-PD001DRE:	A Close Friend Died
PD004CRE-PD004DRE:	Life-Threatening (Natural) Disaster
PD050CRE-PD050DRE:	Child or Grandchild Served in War/Combat
PD006CRE-PD006DRE:	Witnessed Severe Injury/Death of Another Person
PD007CRE-PD007DRE:	Experienced Deep Debt/Financial Loss
PD070CRE-PD070DRE:	Child Experienced Deep Debt/Financial Loss
PD008CRE-PD008DRE:	Serious Legal Difficulties
PD009CRE-PD009DRE:	Incarcerated
PD010CRE-PD010DRE:	Physically Abused by Spouse or Partner
PD011CRE-PD011DRE:	Child Divorced
PD012CRE-PD012DRE:	Child Had Life-Threatening Illness/Accident

Wisconsin Longitudinal Study Codebook

PD120CRE-PD120DRE:	Grandchild Had Life-Threatening Illness/ Accident
PD013CRE-PD013DRE:	Adult Child Moved Back Home
PD014CRE-PD014DRE:	Increased Responsibility for Care of Grandchildren
PD015CRE-PD015DRE:	Aging Parent/In-Law Moved Into Home
PD016CRE-PD016DRE:	Placed Aging Spouse/In-Law/Parent in Nursing Home
PD017CRE-PD017DRE:	Seriously Considered Suicide
PD018REC:	Number of Experience Events Participant Provided an Answer To
PD101RER-PD118RER:	Coping Strategies/Reactions to Stressful Life Events

Note: This variable is based on the information the participant provided about both the first/only and last time they experienced the stressful life event in question, as well as a check box for having never experienced such an event. If the participant provided valid data on the first/only or last time they experienced the event, they were assigned a value of "1" on PD001CRE regardless of whether or not they also contradicted themselves by checking the box for having never experienced the event. This represents a departure from the Dealing with Problems Module of the 2005 mail survey. During the 2005 collection wave, checking a box for having never experienced a stressful life event took precedence over valid age data, if provided (resulting in a value of "2" on this variable's 2005 predecessor even if valid age data

existed).

Note: This variable is based on the information the participant provided about both the first/only and last time they experienced the stressful life event in question, as well as a check box for having never experienced such an event. If the participant provided valid data on the first/only or last time they experienced the event, they were assigned a value of "1" on PD070CRE regardless of whether or not they also contradicted themselves by checking the box for having never experienced the event. This represents a departure from the Dealing with Problems Module of the 2005 mail survey. During the 2005 collection

wave, checking a box for having never experienced a stressful life event took precedence over valid age data, if provided (resulting in a value of "2" on this variable's 2005 predecessor even if valid age data existed).
