National Death Index - Cause of Death

NDI Cause of Death Module

OVERVIEW

In 2000 and 2006 WLS matched dead graduates to NDI’s records. This resulted in 1050 cases for which we have a cause of death. Similarly, matching done in 2001 and 2007 for the selected sibling yielded 927 cases. Since then, these variables have been periodically updated by matching all the known deaths to NDI records. System missing values are assigned to all variables for cases that are not known to be deceased. Cases that are known to be deceased after our last NDI update or those that could not find a match in the NDI records are coded -4, not ascertained.

NDI has used different versions of ICD through out the years. Years 1979-98 use ICD-9, and 1999-present use ICD-10. Thus, the variables in this module are a combination of these coding schemes. Please use DEATYR to determine which code set a particular case is using. Generally speaking, ICD-9 is numeric and ICD-10 begins with a letter.

NDI describes the entity axis conditions as ‘First, to facilitate etiological studies of the relationships among conditions, it was necessary to reflect accurately in coded form each condition and its location on the certification in the exact manner given by the certifier. Secondly, the codification needed to be carried out in a manner by which the underlying cause-of-death could be assigned through computer applications. The approach was to suspend the linkage provisions of the ICD for the purpose of condition coding and code each entity with minimum regard to other conditions present on the certification.’

NDI describes the record axis condition as ‘Essentially, the axis of classification is converted from an entity basis to a record (or person) basis. The record axis codes are assigned in terms of the set of codes that best describe the overall medical certification portion of the death certificate.’

The format of these conditions is a bit different then typical WLS variables. The first position represents the line of the certificate on which the code appears. The second position is the sequence indicator on the line. Positions 3-6 are the ICD-9/ICD-10 code. The 7th and last position is a nature of injury flag. One representing nature of injury codes and a zero representing all other cause codes. The seventh position is blank for ICD-10.

Also please note, ICD-9 variables from the phone interview and mail questionnaire are collapsed into integers. Whereas, NDI goes to the tenths place with an implied decimal.

NOTE: Please see cor743b for the ICD-9 282 recodes, cor743c for the ICD-9 72 recodes, cor939b for the ICD-10 recodes. All are located in Appendix R.

BRIEF VARIABLE DESCRIPTIONS
**NDI01: State Graduate died**

**NDI02-NDI04: Graduate’s cause of death codes**

**NDI05-NDI25: Graduate’s entity-axis conditions**

**NDI26-NDI46: Graduate’s record-axis conditions**

**XNDI01: State Selected Sibling died**

**XNDI02-XNDI04: Sibling’s cause of death codes**

**XNDI05-XNDI25: Sibling’s entity-axis conditions**

**XNDI26-XNDI46: Sibling’s record-axis conditions**
