

## Socializing and Covid

Q1COVID Socializing and Covid

### OVERVIEW

The Socializing and covid module includes repeated measures from prior waves about the frequency of socializing and measures asking about the Covid-19 pandemic that are unique to the timing of this wave of the study. Note that some of the questions in this module were added during fielding so some people were not asked all of the questions. Please see notes under individual measures for details.

### BRIEF VARIABLE DESCRIPTIONS

Variable ranges reference dataset/codebook order and are not necessarily alphabetical.

---

o1z023rer	Number of times in last 4 wks gotten together with friends
o1z024rer	Number of times in last 4 wks gotten together with family
olu008rer	On how many days during the past week did you feel lonely?
ole101he	How many people do you live with?
o1x1321re	How much did you support stay-at-home orders?
o1x1319re	Have you received at least 1 shot of covid19 vaccine?
o1x1319mn	Month received 1st shot
o1x1319yr	Year received 1st shot
o1x1320re	Do you plan on getting the vaccine in the next year?

**o1z023rer: How many times, if at all, during the past four weeks have you gotten together with friends? We mean like going out together or visiting in each other's homes.**

Data source: Sibling Respondent    Collected in: 2020    Mode: In person & telephone  
Source variables: x\_social2

Note: In prior waves we collected a complete household roster and created a summary measure (eg. h001he) for the total number of occupants in the home. Therefore these prior measures have the value 1 for people living alone. Because we ask the number of people R lives with, people who live alone will have the value zero.
