HEOLPREP -- End of Life Preparations Module
Graduate-Spouse Instrument, Phone

For more information on the End of Life Preparations module see Appendix U.

OVERVIEW

With some minor exceptions (listed in the next paragraph), the graduate-spouse version of the End of Life Preparations module is exactly like the graduate version. Thus, please read the COR for the graduate module (cor854EOLPrepGradPhone.doc) for information about sampling, coding, and problems experienced in preparing this module.

The only differences between the graduate and graduate-spouse versions of this module are that

- 1) grad-spouse variables begin with 'a' instead of 'g';
- 2) grad-spouses don't have variables ayl40re, ay063sp, ay064sp, or ay066sp (based on raw variables weplaa/wpelba, wpi1a, wpi2, and wpi4, respectively);
- 3) grad-spouses don't have the 6 pattern variables -- ay116rec, ay118rec, ay120rec, ay125rec, ay126rec, and ay146rec -- which indicate which child in the child roster received a given end-of-life instruction. (This is because, due to remarriages, the spouse's children may be different than the grad's children, and thus sometimes don't appear in the child roster at all);
- 4) grad-spouses were explicitly asked whether they have lived in the Wiscville area in the past 10 years (see next paragraph).

The EOL questions were administered to a randomly selected 70% subsample to reduce the overall length of the survey. However, all graduate-spouses who were Wiscville residents were asked these questions, because, in the mid-1990s, major health care organizations in this area implemented a large-scale advance directive education program. Grad-spouses were considered to be in the Wiscville sample if they lived in the Wiscville area 1) at the time of the 1992-93 survey, 2) when tracked for 2003-2005 survey, and/or 3) at the time of the 2003-2005 interview; or if 4) they reported that they had lived in the Wiscville area at some point in the last 10 years (in response to questions wpa2 or wpa2a in this module).

BRIEF VARIABLE DESCRIPTIONS

ay001re:	Wiscville resident flag (100% of Wiscville residents will get this module).
ay002re:	EOLFLAG for sample selection (70% of respondents will get this module, except for Wiscville residents, who are sampled at 100%, as mentioned).
ay003re:	Has R made *any* preparations for end of life? (I.e., positive response to at least one of ay004re, ay010re, ay020re, and ay030re.)
ay004re:	Has R made medical plans in case of future serious

illness?

ay010re-ay021re: R's discussion of health care plans and preferences
(With anyone? Spouse? Kids? Whom?
How well does person understand?).

ay022re-ay026re: Legal arrangements for someone to make
decisions about R's medical care (Any? Who
has, or would have, that authority? Spouse? Kids?).

ay030re-ay038re: R's living will or advance directive (Exists?
Given to spouse? To kids? To whom?).

ay040re-ay046re: Inheritance plans (Who would get R's assets?
Does R have will? Etc.).

ay060re-ay062re: R's hopes/plans for last days or weeks of life
(Where spent? Discontinue treatments?).

ay065re: How strictly to follow R's wishes for end of life
medical care.

ay070rec: At what stage in the Terri Schiavo case did R complete
the WLS phone survey?

ay001re: Is respondent a Wiscville resident?

Data source: Graduate Spouse Respondent Collected in: 2004 Mode: phone

Frequencies				
Value	Label	Male	Female	Total
0	R IS NOT WISCVILLE RESIDENT	1748	2018	3766
1	R IS WISCVILLE RESIDENT	60	64	124

Note: "Wiscville" is a pseudonym for a hospital referral region in Wisconsin in which, in the mid-1990s, major health care organizations implemented a large-scale advance directive education program. Grad-spouses were considered to be in the Wiscville sample if they directly reported living in the Wiscville area at some point in the last 10 years (wpa2, wpa2a), or if they or their spouses (the graduates) lived in the Wiscville area either at the time of the 1992-93 survey or at the time of the 2003-2005 survey.

ay002re: Is respondent in 70% End-of-Life Sample? Does not apply to current or last 10 years Wiscville residents, since 100% of them will get the End of Life modules.

2	NO	271	393	664

Note: This variable is set to 1 "YES" if "spouse" is mentioned in AY016RE, AY018RE, or AY020RE (i.e., if any of those variables are set to 1 SPOUSE; 2 SPOUSE AND CHILDREN; 167 SPOUSE AND OTHER RELATIVES; 169 SPOUSE,KID(S),&OTHER RELATIVES; 170 SPOUSE AND NONRELATIVES; or 172 SPOUSE, KID/GKID & NONRELATIVES). It is set to "NO" if none of the people mentioned in those variable is the spouse. It is set to -2 "INAPPROPRIATE" if no spouse is mentioned and any of the three constituent variables is -1 or -3, or if this question doesn't apply because R is not in the End-of-Life sample or didn't discuss health care plans with anyone. In a few (very rare) cases, respondents who in our records are not currently married nonetheless list a spouse. These cases are retained.

4	NOT AT ALL	0	1	1

Note: This variable shows the level of understanding associated with the person or people referred to in variable AY012REC above. Thus, if AY012REC is based on AY016RE, this variable replicates AY017RE; if it's based on AY018RE, this replicates AY019RE; and if it's based on AY020RE, this variable replicates AY021RE.

This variable is set to "no" if none of the people mentioned in AY016RE, AY018RE, and AY020RE is a child. It is set to -2 "INAPPROPRIATE" if any of the three constituent variables is -1 or -3, or if this question doesn't apply because R is not in the End-of-Life sample or didn't discuss health care plans with anyone. In rare cases, respondents who according to our records are childless may nonetheless name a child. These cases are retained.

ay015rec: How well does child understand R's preferences and plans for future medical treatment? Convenience variable paired with AY014REC.
