

Phone: Cognition

The respondents were asked to give answers to eight of the fourteen items from the Weschler Adult Intelligence Scale (WAIS). The simplest items from the WAIS were eliminated due to the fact that the general ability of the sample is high enough to cause little variation in response to simple items.

The eight items were assigned scores between 0 and 2, unless the interview was a useable partial that was terminated before or during the cognition questions. Any cognition question that was not asked due to partialling out is coded -3.

See Appendix G, COR458 for details about how the scores 0 - 2 were chosen for the primary sample.

ri001re	Sum of the scores for the cognition questions.
ri002re	In what way are an orange and a banana alike?
ri003re	In what way are a table and a chair alike?
ri004re	In what way are an eye and an ear alike?
ri005re	In what way are an egg and a seed alike?
ri006re	In what way are air and water alike?
ri007re	In what way are work and play alike?
ri008re	In what way are a fly and a tree alike?
ri009re	In what way are praise and punishment alike?

ri001re: Total cognition score.

15		10	14	24

Note: See ri002re, ri003re, ri004re, ri005re, ri006re, ri007re, ri008re, ri009re.

If at least one individual score is -3, then RI001RE is -3. The total cognition score can range from 0 (the lowest possible) to 16 (the highest possible).

See Appendix G, COR458 for details about how the scores 0 - 2 were chosen for the primary sample.
