Note: We do not have complete job histories but we have collected fairly
complete histories in a complex fashion. It is important to read
COR553 before using any variables in the job history section.
Pattern codes 9, 10, and 19 should not have occurred but did.
This happened when the respondent had reported on two employers,
then answered that he/she held 2 or more jobs for 6 months or

longer, and ultimately only reported about one job held for 6 months or longer.

Note: ** See COR522;
RF008JSD is a count of the years between 1975 and 1994 of the
years in which the respondent worked. If they were employed for
any part of a year, they get counted as working in that year.

There were 17 interviews that were completed in January, 1994 and worked 20 years.

rf009jsd: Number of years since respondent has had a main job.

Note: There are differences between the currently working flag (RF002JS) and this summary variable for years since last worked. There are

7289 cases with zero years since they last worked. There are 7198 cases saying they currently work. Most discrepant cases are due to the fact that people left their last job by the time they were interviewed in a given year. RF009JSD counts them as having worked that entire year, where RF002JS indicates that they are not currently working.
