

Donald Cox, Bruce E. Hansen, Emmanuel Jimenez, "How responsive are private transfers to income? Evidence from a laissez-faire economy" *Journal of Public Economics*, 2004, 2193-2219.

The data set contains 8685 observations on urban Philippino households. There are 18 variables. The data set is taken from the replication file for the above paper, reducing the number of variables and trimming the top 2% of income, and observations with negative income

The data are presented in Excel, Stata, and text files.

The variable definitions are as follows.

- 1 Transfers received from Abroad
- 2 Transfers received Domestically
- 3 Transfers received InKind
- 4 Gifts, Transfers out (gross)
- 5 Total Income
- 6 Wage and Salary Income
- 7 Entrepreneurial Income
- 8 Rental Income
- 9 Interest Income
- 10 Pension and Retirement Income
- 11 Dividend Income
- 12 Primary school graduate (dummy)
- 13 Some secondary school (dummy)
- 14 Secondary school graduate (dummy)
- 15 Some University (dummy)
- 16 University graduate (dummy)
- 17 Age of Household head
- 18 Female-headed household (dummy)
- 19 Married (dummy)
- 20 Number of children aged 1 or less
- 21 Number of children aged 1 to 7
- 22 Number of children aged 8 to 15
- 23 Household size
- 24 Husband and wife both work (dummy)
- 25 Head not employed (dummy)
- 26 Head of household a married female (dummy)
- 27 Region (0 through 13)
