

Card, Mas, and Rothstein, Quarterly Journal of Economics (2008) "Tipping and the dynamics of segregation"

The original replication file is posted on Jesse Rothstein's website  
<https://berkeley.app.box.com/v/tippingreplication>

This is a reorganized and abridged version of the CMR data set. Their data came in multiple stata files with detailed replication files. We used those files to merge several of their files into a single file sufficient for the results as reported

This file has 48,643 observations (census tracts) and 46 variables.
